COVID-19 Status Report
Oak Park Village Board of Trustees

To: Village President and Village Board of Trustees

Fr: Kevin Jackson, Village Manager

The memo is a weekly status report presented Wednesdays and provides a brief summary of information regarding Village of Oak Park operational activities in response to COVID-19.

New COVID-19 Cases

The Village of Oak Park Department of Public Health received official notification of 102 COVID-19 cases from April 7-13, 2022. This is a 10.9% increase over the last 7-day period, and a 175.7% increase over the cases 30 days ago.

COVID-19 Community Transmission Rates

Based on the positives cases reported to the Village of Oak Park, for the week of April 7-13, our weekly COVID-19 rate of 187 cases per 100,000 places us in high community transmission. The CDC recommends tracking community transmission rates and using this to set control measures for hospitals and congregate living facilities. The state health department encourages tracking of community transmission rates for decision making around certain COVID-19 protocols in schools.

These numbers do not reflect those who tested positive using at home self-administered test. At-home test must be confirmed at an official testing site (pharmacy, physician office, health department, school, etc.) in order to be included in the official state count.

COVID-19 Community Levels

On February 25, 2022, the CDC introduced COVID-19 Community Levels of low, medium, and high. Oak Park is in the low level, as defined by less than 200 cases per 100,000 (we have 187 per 100,000), and less than 10% of staffed inpatient beds occupied by COVID-19 patients (as of April 6th we have 3.5% of our hospital beds occupied by COVID-19 patients). We currently track our COVID admissions as cumulative totals, and the CDC definition requires new cases per 7 days. We will continue to adapt our data to align with CDC definitions so we can track and report on this metric.

Deaths

There were 0 reported deaths to residents from COVID-19 in the community for this time period.

Oak Park Residents Vaccinated

Oak Park reports 88.1% of residents receiving their first dose and 80.8% completing their primary vaccination series.

Age Range Data

Oak Park residents who tested positive for COVID-19 ranged in age from infancy to 75 years.

Age Range	Cases April 7-13	% of Cases April 7-13
0-4	8	7.8%
5-13	34	33.3%
14-19	2	2.0%
20-29	12	11.8%
30-39	8	7.8%
40-49	17	16.7%
50-59	10	9.8%
60-69	9	8.8%
70-79	2	2.0%
80-89	0	0%
90-99	0	0%
Unknown	0	0%
Total	102
