

# Let's talk about gun safety

Sharing your own gun  
storage habits

Hi! Patrice is excited about having Mindy over! Just a few things I like to share and ask when we're hosting: does your child have any allergies I should know about or issues with animals? We have two cats and dog. We are gun owners, as well. All guns are locked safely and ammunition is stored and locked in a separate area. If you have any questions/concerns please let me know.

Thanks. No allergies or pet issues here, and I appreciate you sharing about the gun storage info.
