The National Community Survey™
© 2001-2019 National Research Center, Inc.

The NCS™ is presented by NRC in collaboration with ICMA.

NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

About

The National Community Survey™ (The NCS™) report is about the “livability” of Oak Park. The phrase “livable community” is used here to evoke a place that is not simply habitable, but that is desirable. It is not only where people do live, but where they want to live.

Great communities are partnerships of the government, private sector, community-based organizations and residents, all geographically connected. The NCS captures residents’ opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement).

The Community Livability Report provides the opinions of a representative sample of 696 residents of the Village of Oak Park. The margin of error around any reported percentage is 4% for all respondents. The full description of methods used to garner these opinions can be found in the *Technical Appendices* provided under separate cover.

Quality of Life in Oak Park

About 9 in 10 residents rated the quality of life in Oak Park as excellent or good. This rating was similar to the national benchmark (see Appendix B of the *Technical Appendices* provided under separate cover).

Shown below are the eight facets of community. The color of each community facet summarizes how residents rated it across the three sections of the survey that represent the pillars of a community – Community Characteristics, Governance and Participation. When most ratings across the three pillars were higher than the benchmark, the color for that facet is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

In addition to a summary of ratings, the image below includes one or more stars to indicate which community facets were the most important focus areas for the community. Residents identified Safety and Economy as priorities for the Oak Park community in the coming two years. Ratings within the facet of Education and Enrichment tended to be higher than the national averages, while evaluations for the remaining facets were on par with national comparison communities. This overview of the key aspects of community quality provides a quick summary of where residents see exceptionally strong performance and where performance offers the greatest opportunity for improvement. Linking quality to importance offers community members and leaders a view into the characteristics of the community that matter most and that seem to be working best.

Details that support these findings are contained in the remainder of this Livability Report, starting with the ratings for Community Characteristics, Governance and Participation and ending with results for Oak Park’s unique questions.

Community Characteristics

What makes a community livable, attractive and a place where people want to be?

Overall quality of community life represents the natural ambience, services and amenities that make for an attractive community. How residents rate their overall quality of life is an indicator of the overall health of a community. In the case of Oak Park, 92% rated the village as an excellent or good place to live. Respondents' ratings of Oak Park as a place to live were similar to ratings in other communities across the nation.

In addition to rating the village as a place to live, respondents rated several aspects of community quality. About 9 in 10 residents favorably assessed Oak Park as a place to raise children, the overall image or reputation of the village, and its overall appearance; these ratings were strong and higher than the national benchmarks. Similar to comparison communities, about 9 in 10 respondents gave high marks to their neighborhood as a place to live. Evaluations of Oak Park as a place to retire were lower than average, with less than half rating this as excellent or good.

Delving deeper into Community Characteristics, survey respondents rated over 40 features of the community within the eight facets of Community Livability. Overall, at least half of respondents reviewed most aspects of Community Characteristics positively and ratings tended to be similar to or higher than other benchmark communities.

Assessments for the majority of aspects within the facets of Education and Enrichment (such as overall education and enrichment opportunities) and Community Engagement (such as opportunities to participate in community matters) were outstanding and higher than the national benchmarks. Scores also were above average for ease of travel by walking and by bicycle, vibrancy of the downtown/commercial area, Oak Park as a place to visit, and availability of affordable quality health care, among others.

However, survey participants' ratings for ease of travel by car, public parking, and cost of living were lower than observed in other municipalities across the country.

Respondents' evaluations of availability of paths and walking trails, overall built environment, Oak Park as a place to work, fitness and recreational opportunities, and adult educational opportunities improved from 2017 to 2019 (see the *Trends over Time* report provided under separate cover for more details). Additionally, positive reviews of employment opportunities improved in 2019, with a total increase of 21% since 2008.

Governance

How well does the government of Oak Park meet the needs and expectations of its residents?

The overall quality of the services provided by Oak Park as well as the manner in which these services are provided is a key component of how residents rate their quality of life. About 8 in 10 residents gave favorable evaluations to the overall quality of services provided by the Village, while 3 in 10 gave high marks to services provided by the Federal Government. Both ratings were similar to national averages.

Survey respondents also rated various aspects of Oak Park’s leadership and governance. In general, at least 4 in 10 residents rated each aspect positively. About 8 in 10 residents favorably assessed the customer service provided by Oak Park employees, an improvement from scores in 2017; while 6 in 10 gave high marks to the Village welcoming resident involvement. All ratings were similar to those given in other communities.

Respondents evaluated over 30 individual services and amenities available in Oak Park. Broadly, at least 6 in 10 respondents reviewed most government services positively and ratings tended to be similar to those observed in other communities nationwide. The highest-rated services included police, fire, ambulance or emergency medical services, Village parks, recreation centers, and public libraries, with about 9 in 10 residents assigning positive scores. Additionally, Village parks, recreation centers, and libraries were assigned ratings that exceeded the national benchmark, and libraries receiving the second highest rating among comparison communities nationwide.

Overall Quality of Village Services

Reviews for animal control, bus or transit services, health services, and public information also were strong and higher than the national benchmarks. Evaluations for all other aspects of Governance were on par with the national averages.

Respondents’ evaluations of 12 aspects of Governance improved from 2017 to 2019, with most increases occurring within the facets of Natural Environment, Built Environment, and Community Engagement. Some of the largest increases in 2019 compared to 2017 were for emergency preparedness, natural areas preservation, and open space (with increases of 13%, 12%, and 10%, respectively).

Participation

Are the residents of Oak Park connected to the community and each other?

An engaged community harnesses its most valuable resource, its residents. The connections and trust among residents, government, businesses and other organizations help to create a sense of community, a shared sense of membership, belonging and history. About three-quarters of respondents gave excellent or good scores to the sense of community in Oak Park; this rating was higher than the national benchmark.

About 9 in 10 survey respondents indicated they would recommend living in Oak Park to someone who asked and 8 in 10 planned to remain in the community for the next five years, both of which were on par with national averages. More Oak Park residents (67%) reported contacting Village employees than residents in other comparison communities.

The survey included over 30 activities and behaviors for which respondents indicated how often they participated in or performed each, if at all. Levels of Participation varied widely across the different facets, making the benchmark comparisons, as well as comparisons to Oak Park over time, useful for interpreting the results. About 9 in 10 respondents had recycled at home, purchased goods or services in Oak Park, visited a Village park, talked to or visited with neighbors, or voted in local elections. Fewer than 2 in 10 had contacted Oak Park elected officials or watched a local public meeting. Each of these ratings were all on par with communities nationwide.

Compared to municipalities across the country, more Oak Park residents had used Oak Park public libraries, walked or biked instead of driving, and used public transportation instead of driving. Fewer residents in Oak Park had stocked supplies in preparation for an emergency, worked in Oak Park, or believed the economy would have a positive impact on their income than in comparison communities.

In 2019, fewer respondents had reported a crime in the 12 months prior to the survey than in 2017. Additionally, in 2019, fewer residents reported volunteering or doing a favor for a neighbor than in 2017.

Special Topics

The Village of Oak Park included four questions of special interest on The NCS, with topics related to the importance of Village services, problems in Oak Park, sources of Village information, and the value of services for taxes paid.

The Village asked residents to rate how important it was for Oak Park to maintain various services at least at current levels. Almost all residents indicated it was essential or very important to maintain fire and emergency medical services (95%), maintenance of the public way, street cleaning, and snow plowing (95%), and police protection (94%). At least half of residents indicated that it was essential or very important to maintain the remaining services at least at current levels, but about 4 in 10 residents said it was somewhat important or not at all important to maintain partner agencies that promote or support tourism, housing, and the arts in Oak Park.

Figure 4: Importance of Maintaining Village Services

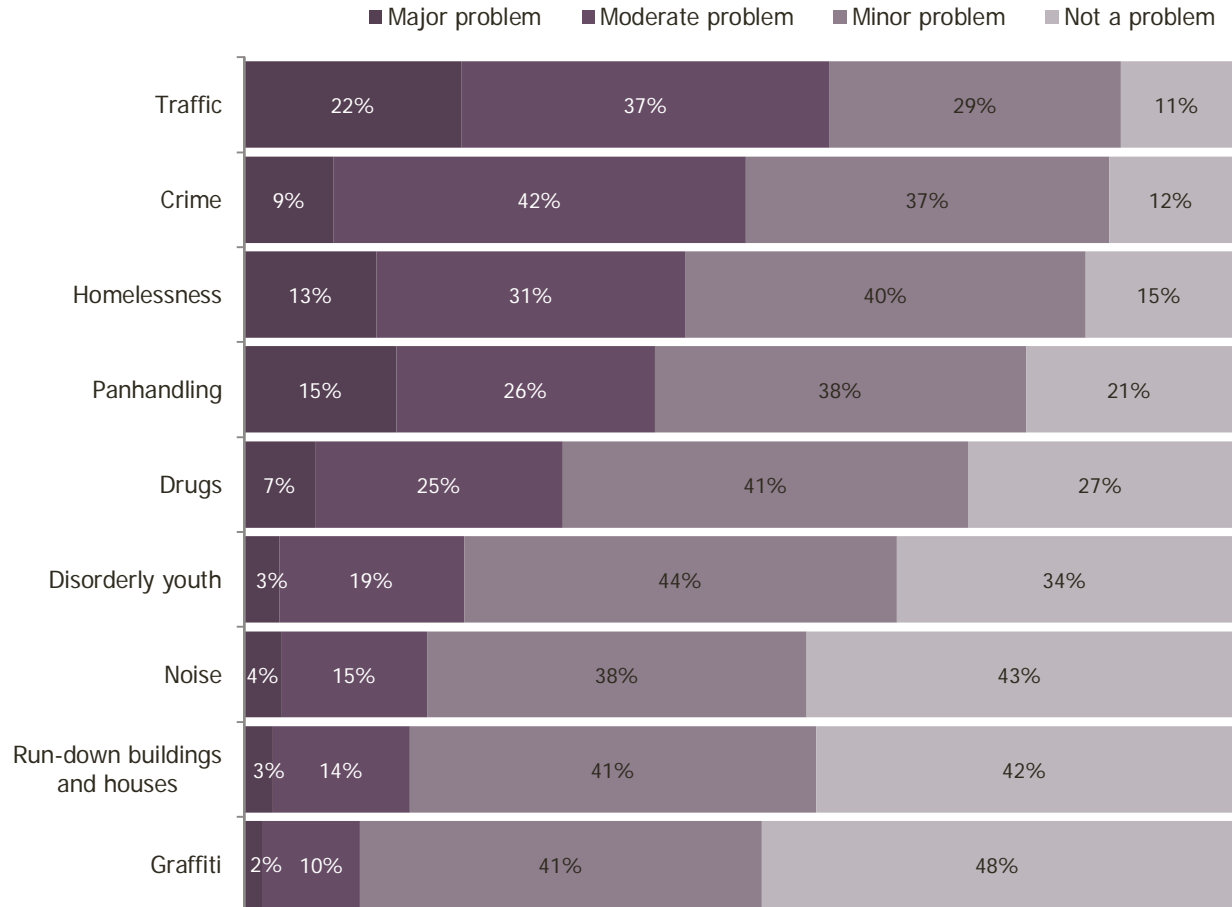

Please rate how important, if at all, it is for the Village of Oak Park to maintain each of the following services at least at current levels (as compared with cutting the levels of service):

At least half of community members indicated that traffic and crime were a moderate or major problem in Oak Park. Conversely, at least one-third of residents thought disorderly youth, noise, run-down buildings and houses, and graffiti were not a problem in Oak Park.

Figure 5: Problems in Oak Park

To what degree, if at all, is each of the following a problem in Oak Park?

The National Community Survey™

When asked about sources utilized for obtaining information about the Village, about three-quarters of residents said they get a lot or some information from the Village of Oak Park OP/FYI newsletter and other Village mailings, friends and neighbors, the Village Park website, and local newspapers (print and online). About half of residents indicated they get a lot or some information from local social media pages/groups and the Village of Oak Park email news. About 3 in 10 residents indicated they get information about Oak Park from the Village of Oak Park Facebook and Twitter pages, and about 1 in 10 get information from the Village’s cable TV channel (VOP-TV).

Figure 6: Sources of Village Information

How much information about Oak Park, if any, do you get from each of the following sources?

The National Community Survey™

Oak Park residents rated the value of services for taxes paid to various community entities. The highest-rated entities included Oak Park Public Library and the Park District of Oak Park, with about 8 in 10 respondents rating these as excellent or good value for the taxes paid. Of those who had an opinion, about 7 in 10 respondents gave high marks to Elementary School District 97, Oak Park Fire & Police Pensions, and OPRF High School District 200. Fewer respondents felt that they got an excellent or good value for the taxes they paid to Cook County.

Figure 7: Value of Taxes Paid

Please rate the value of services for the taxes paid to each of the following (percent of your property tax bill):

Conclusions

Sense of community is strong in Oak Park and residents remain loyal.

Residents' assessments of the sense of community in the village were above the national average, with about three-quarters rating this as excellent or good. About 9 in 10 respondents were likely to recommend living in Oak Park to someone who asked and about 8 in 10 planned to remain in Oak Park for the next five years. Most community members also gave high marks to the overall quality of life in Oak Park (87% excellent or good), along with the village (92%) and their neighborhoods (88%) as places to live. Ratings for Oak Park as a place to raise children, the village's overall image or reputation, and its overall appearance were exceptional and higher than average, with positive reviews from about 9 in 10 residents.

Although residents feel safe, safety remains a community priority.

About three-quarters of residents gave positive scores to the overall feeling of safety in Oak Park. Additionally, almost all residents felt safe in their neighborhoods (96%) and in the downtown/commercial area (95%). Residents indicated that Safety was an important focus for the Village to address in the coming two years; about 9 in 10 respondents said that the overall feeling of safety was an essential area of focus for the village. Additionally, about half of respondents felt that crime was a major or moderate problem in Oak Park.

Out of all Village services, police, fire, and ambulance/emergency medical services were given some of the most positive reviews. In 2019, more residents gave high marks to fire prevention and emergency preparedness than in 2017, and fewer residents had reported a crime. About 9 in 10 community members felt that it was essential or very important for the Village to maintain fire and emergency medical assistance and police protection services at least at current levels. About 7 in 10 residents positively rated the value of services for taxes paid to Oak Park Fire and Police Pensions.

Residents praise the local economy, but are concerned about cost of living.

Assessments of Oak Park as a place to visit and the vibrancy of the downtown/commercial area were strong and higher than the national benchmarks. Similar to other comparison communities, about two-thirds of residents positively rated the overall economic health of Oak Park, shopping opportunities, Oak Park as a place to work, and the overall quality of business and service establishments. Furthermore, ratings of employment opportunities and Oak Park as a place to work improved from 2017 to 2019.

Survey participants highlighted the Economy as a priority for the Village in the next two years. About 9 in 10 respondents indicated that it was essential or very important for the Village to maintain services related to business retention, development, and attraction at least at current levels. However, evaluations of cost of living in Oak Park were lower than the national benchmarks. Compared to other municipalities, fewer Oak Park residents believed the economy would have a positive impact on their income.

Education and Enrichment opportunities in Oak Park are an asset that residents appreciate.

Residents applauded aspects and services related to Education and Environment, with overall evaluations that tended to be higher than the national benchmarks. These include above-average ratings for the overall education and enrichment opportunities of Oak Park, along with opportunities to attend religious or spiritual events and activities. Respondents' assessments of public libraries were outstanding, with 97% assigning excellent or good scores, ranking second among national comparison communities. Additionally, more residents in Oak Park reported using Oak Park public libraries compared to other jurisdictions nationwide. Reviews of opportunities to participate in cultural/arts/music activities and adult educational opportunities were also higher than the national average; the latter rating improved from 2017 to 2019. Of those who had an opinion, a majority of residents gave positive ratings to the value of services for taxes paid to Oak Park Public Library (84%), Elementary School District 97 (72%), OPRF High School District 200 (68%), and Triton Community College District 504 (56%).

Summary

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents’ opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Oak Park’s performance in the eight facets of community livability with the “General” rating as a summary of results from the overarching questions not shown within any of the eight facets. The “Overall” represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Oak Park’s community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Broadly, ratings within most facets tended to be positive and similar to the national benchmarks. Within the pillar of Community Characteristics, assessments of Education and Enrichment and Community Engagement tended to be higher than the national averages. In Governance, ratings within the facets of Recreation and Wellness and Education and Enrichment were strong and higher than those observed in other communities. Levels of Participation within the facet of Mobility were higher than the national benchmarks, while levels within the facet of Economy were lower than the national benchmarks. This information can be helpful in identifying the areas that merit more attention.

About

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. Communities conducting The NCS can choose from a number of optional services to customize the reporting of survey results. Oak Park’s Comparisons by Demographic Subgroups is part of a larger project for the Village and additional reports are available under separate cover. This report discusses differences in opinion of survey respondents by length of residency in Oak Park, housing tenure, annual household income, presence of an adult 65 years or older in the household, race, age and sex of respondent.

Understanding the Tables

For most of the questions, one number appears for each question. Responses have been summarized to show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who participated in an activity at least once. It should be noted that when a table that does include all responses (not a single number) for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

The subgroup comparison tables contain the crosstabulations of survey questions by selected respondent characteristics. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. As subgroups vary in size and each group (and each comparison to another group) has a unique margin of error, statistical testing is used to determine whether differences between subgroups are statistically significant. Statistical testing was not performed on multiple response questions.

Each column in the following tables is labeled with a letter for each subgroup being compared. The “Overall” column, which shows the ratings for all respondents, also has a column designation of “(A)”, but no statistical tests were done for the overall rating.

For each pair of subgroups ratings within a row (a single question item) that has a statistically significant difference, an upper case letter denoting significance is shown in the cell with the larger column proportion. The letter denotes the subgroup with the smaller column proportion from which it is statistically different. Subgroups that have no upper case letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Figure 1 below, respondents age 55 and over (C) gave significantly higher rating to the overall quality of life than those age 18 to 34 (A) and 35 to 54 (B), as denoted by the “A B” listed in the cell of the ratings for those 55+. This was also true of women (A) over men (B); people who were White (A) over those who were Hispanic and/or other race (B); homeowners (B) over renters (A); and those living in detached housing (A) over those living in attached housing (B).

Figure 1: Community Characteristics – General (Example Only)

	Age			Sex		Race/ethnicity		Housing tenure		Housing unit type		Overall
	18-34	35-54	55+	Female	Male	White alone, not Hispanic	Hispanic and/or other race	Rent	Own	Detached	Attached	
Percent rating positively (e.g., excellent/good)	(A)	(B)	(C)	(A)	(B)	(A)	(B)	(A)	(B)	(A)	(B)	(A)

Findings

Notable differences between demographic subgroups included the following:

- Residents who lived in Oak Park for five years or less tended to give higher marks to aspects related to Economy and government performance than residents who lived in Oak Park for more than five years. These residents were also more likely to recommend living in Oak Park to someone who asked than residents who had lived in Oak Park for longer. Respondents who lived in Oak Park for more than five years tended to be more engaged with the community, reporting higher rates of volunteering, attending or watching a local public meeting, and voting in local elections, among others.
- Community members who rented their homes assigned more positive ratings to many of the community characteristics within the facets of Mobility and Economy than those who owned their homes. Renters also gave higher scores to government performance. However, homeowners reviewed garbage collection, recycling, and drinking water more favorably than renters, and were more likely to participate in most activities related to Recreation and Wellness, Education and Enrichment, and Community Engagement.
- Respondents who had an annual household income of \$150,000 or more tended to more positively evaluate the variety of housing options and were less likely to be under housing cost stress than residents who had an annual income of less than \$150,000. Additionally, respondents who had an annual household income of \$150,000 or more were more likely to give favorable ratings to opportunities to participate in social events and activities, opportunities to volunteer, neighborliness of residents in Oak Park, and the sense of community.
- When differences were noted, households with members aged 65 or older were much less likely to report using alternative modes of transportation and participate in Recreation and Wellness activities compared to households without members aged 65 or older.
- Community members who were not white assessed several Mobility-related characteristics and government performance more positively than community members who were white. Conversely, respondents who were white tended to give higher ratings to characteristics related to Education and Enrichment and Community Engagement.
- Residents aged 18-34 were more likely to feel safe in their neighborhood and in the downtown/commercial area than residents aged 35 or older. Residents aged 18-34 also gave higher ratings to Economy, such overall economic health and overall quality of business and services establishments, compared to residents who were older. Conversely, residents aged 35 or older were more likely to indicate that the overall economic health of Oak Park was an essential or very important focus for the community.
- Female residents, compared to males, tended to assign more positive reviews to general Community Characteristics, including overall quality of life, Oak Park as a place to raise children, the village's overall image or reputation, and its appearance.

Summary

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. Communities conducting The NCS can choose from a number of optional services to customize the reporting of survey results. Oak Park’s Comparisons by Geographic Subgroups is part of a larger project for the Village and additional reports are available under separate cover. This report discusses differences in opinion of survey respondents by quadrant in Oak Park.

Understanding the Tables

For most of the questions, one number appears for each question. Responses have been summarized to show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who participated in an activity at least once. It should be noted that when a table that does include all responses (not a single number) for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

The subgroup comparison tables contain the crosstabulations of survey questions by quadrant. Chi-square or ANOVA tests of significance were applied to these breakdowns of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent “real” differences among those populations. As subgroups vary in size and each group (and each comparison to another group) has a unique margin of error, statistical testing is used to determine whether differences between subgroups are statistically significant. Statistical testing was not performed on multiple response questions.

Each column in the following tables is labeled with a letter for each subgroup being compared. The “Overall” column, which shows the ratings for all respondents, also has a column designation of “(A)”, but no statistical tests were done for the overall rating.

For each pair of subgroup ratings within a row (a single question item) that has a statistically significant difference, an upper case letter denoting significance is shown in the cell with the larger column proportion. The letter denotes the subgroup with the smaller column proportion from which it is statistically different. Subgroups that have no upper case letter denotation in their column and that are also not referred to in any other column were not statistically different.

For example, in Figure 1 below, respondents in Districts 1 (A) and 2 (B) gave significantly lower ratings to overall quality of life than respondents in Districts 3 (C) and 4 (D), as denoted by the “A B” listed in the cell of the ratings for Districts 3 and 4. The overall quality of life rating in District 4 (D) also was significantly lower than that of District 3 (C) (as indicated by the “D” in the rating for District 3).

Figure 1: Community Characteristics – General (Example Only)

Percent rating positively (e.g., excellent/good)	District				Overall (A)
	District 1 (A)	District 2 (B)	District 3 (C)	District 4 (D)	
The overall quality of life in ABC	73%	74%	79% A B D	76% A B	78%
Overall image or reputation of ABC	65%	66%	69% A B	71% A B C	70%
ABC as a place to live	80%	81%	85% A B D	82% A B	84%

Four quadrants were tracked for comparison and the number of completed surveys for each are in the figure below.

Figure 2: Geographic Areas

Quadrant	Number of Completed Surveys
Northwest	176
Northeast	195
Southwest	167
Southeast	157

Findings

Notable differences between quadrants included the following:

- Residents who lived in the Southeast quadrant were more likely to use the Village of Oak Park Facebook & Twitter pages and the Village of Oak Park email news to get information about the Village compared to those living in the other quadrants. However, Southeast respondents assigned lower marks to the neighborliness of residents in Oak Park and bus or transit services compared to those living in other areas of the village.
- Residents who lived in the Northwest and Southwest were more likely to positively rate their neighborhood as a place to live. However, residents who lived in the Northeast or Southeast gave higher ratings to traffic flow on major streets and ease of travel by car in Oak Park, and were more likely to indicate that overall opportunities for education and enrichment were an essential or very important focus for Oak Park in the coming two years.
- When differences were noted, respondents who lived in the Southwest were less likely to indicate that the overall economic health of Oak Park was an essential or very important focus for the community compared to their counterparts.
- Community members who lived in the Southwest were more likely to rate homelessness, noise, and panhandling as a problem compared to those living in the Northeast and Southeast quadrants.

The National Community Survey™

Table 1: Community Characteristics - General

	Quadrant				Overall (A)

Summary

The National Community Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report discusses trends over time, comparing the 2019 ratings for the Village of Oak Park to its previous survey results in 2000, 2004, 2008, 2011, 2013, 2015 and 2017. Additional reports and technical appendices are available under separate cover.

Trend data for Oak Park represent important comparison data and should be examined for improvements or declines. Deviations from stable trends over time, especially, represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Meaningful differences between survey years have been noted within the following tables as being "higher" or "lower" if the differences are greater than six percentage points between the 2017 and 2019 surveys, otherwise the comparisons between 2017 and 2019 are noted as being "similar." Additionally, benchmark comparisons for all survey years are presented for reference. Changes in the benchmark comparison over time can be impacted by various trends, including varying survey cycles for the individual communities that comprise the benchmarks, regional and national economic or other events, as well as emerging survey methodologies.

Overall, ratings in Oak Park for 2019 generally remained stable. Of the 131 items for which comparisons were available, 109 items were rated similarly in 2017 and 2019, two items showed a decrease in ratings and 20 showed an increase in ratings. Notable trends over time included the following:

- Within the pillar of Community Characteristics, ratings for seven aspects increased from 2017 to 2019, including availability of paths and walking trails, overall built environment, employment opportunities, and Oak Park as a place to work. Other improvements in 2019 included fitness and recreational opportunities and adult educational opportunities. Assessments of shopping opportunities, employment opportunities, and availability of affordable health care have been on the rise since 2008 (with increases of 26%, 21%, and 18%, respectively, over the last decade).
- More than half of the 20 items that saw rating improvements were within Governance. Evaluations for fire prevention, emergency preparedness, yard waste pick-up, open space, and natural areas preservation increased from 2017 to 2019. Residents gave higher marks to three items related to government performance (overall customer service of Oak Park employees, welcoming resident involvement and being honest). Additionally, reviews for public information, sewer services, storm drain, and land use, planning and zoning increased from 2017 to 2019. While ratings for economic development remained stable from 2017 to 2019, assessments have increased from 33% assigning ratings of excellent or good in 2011 to 56% in 2019.
- From 2017 to 2019, levels of Participation for most items remained stable in Oak Park. Fewer community members reported a crime in 2019. However, residents reported lower levels of volunteering and doing a favor for a neighbor in 2019 compared to 2017.

Total	100%	N=686

Appendix B: Benchmark Comparisons

Comparison Data

NRC's database of comparative resident opinion is comprised of resident perspectives gathered in surveys from over 600 communities whose residents evaluated the same kinds of topics on The National Community Survey. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. The Village of Oak Park chose to have comparisons made to the entire database.

Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Oak Park's "percent positive." The percent positive is the combination of the top two most positive response options (i.e., "excellent" and "good," "very safe" and "somewhat safe," etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating "yes" or participating in an activity at least once a month. The second column is the rank assigned to Oak Park's rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Oak Park's rating to the benchmark.

In that final column, Oak Park's results are noted as being "higher" than the benchmark, "lower" than the benchmark or "similar" to the benchmark, meaning that the average rating given by Oak Park residents is statistically similar to or different (greater or lesser) than the benchmark. Being rated as "higher" or "lower" than the benchmark means that Oak Park's average rating for a particular item was more than 10 points different than the benchmark. If a rating was "much higher" or "much lower," then Oak Park's average rating was more than 20 points different when compared to the benchmark.

Benchmark Database Characteristics	
Region	Percent
New England	3%
Middle Atlantic	5%
East North Central	15%
West North Central	13%
South Atlantic	22%
East South Central	3%
West South Central	7%
Mountain	16%
Pacific	16%
Population	Percent

Appendix C: Detailed Survey Methods

The National Community Survey™ (The NCS™), conducted by National Research Center, Inc., was developed to provide communities an accurate, affordable and easy way to assess and interpret resident opinion about important local topics. Standardization of common questions and survey methods provide the rigor to assure valid results, and each community has enough flexibility to construct a customized version of The NCS.

Results offer insight into residents' perspectives about the community as a whole, including local amenities, services, public trust, resident participation and other aspects of the community in order to support budgeting, land use and strategic planning and communication with residents. Resident demographic characteristics permit comparison to the Census as well as comparison of results for different subgroups of residents. The Village of Oak Park funded this research. Please contact Oak Park Communications Director David Powers at dpowers@oak-park.us if you have any questions about the survey.

Survey Validity

The question of survey validity has two parts: 1) how can a community be confident that the results from those who completed the questionnaire are representative of the results that would have been obtained had the survey been administered to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

To answer the first question, the best survey research practices were used for the resources spent to ensure that the results from the survey respondents reflect the opinions of residents in the entire community. These practices include:

- Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent. A higher response rate lessens the worry that those who did not respond are different than those who did respond.
- Selecting households at random within the community to receive the survey to ensure that the households selected to receive the survey are representative of the larger community.
- Over-sampling multi-family housing units to improve response from hard-to-reach, lower income or younger apartment dwellers.
- Selecting the respondent within the household using an unbiased sampling procedure; in this case, the "birthday method." The cover letter included an instruction requesting that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.
- Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- Inviting response in a compelling manner (using appropriate letterhead/logos and a signature of a visible leader) to appeal to recipients' sense of civic responsibility.
- Providing a pre-addressed, postage-paid return envelope.
- Offering the survey in Spanish or other language when requested by a given community.
- Weighting the results to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record his or her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g., reporting tolerant behaviors toward "oppressed groups," likelihood of voting for a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), his or her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), his or her confidence that he or she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g., driving habits), reported intentions to behave with observed future behavior (e.g., voting choices) or reported opinions about current community quality

with objective characteristics of the community (e.g., feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g., family abuse or other illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality vary, with some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of firefighters, breadth of services and training provided). Resident opinion commonly reflects objective performance data but is an important measure on its own. NRC principals have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

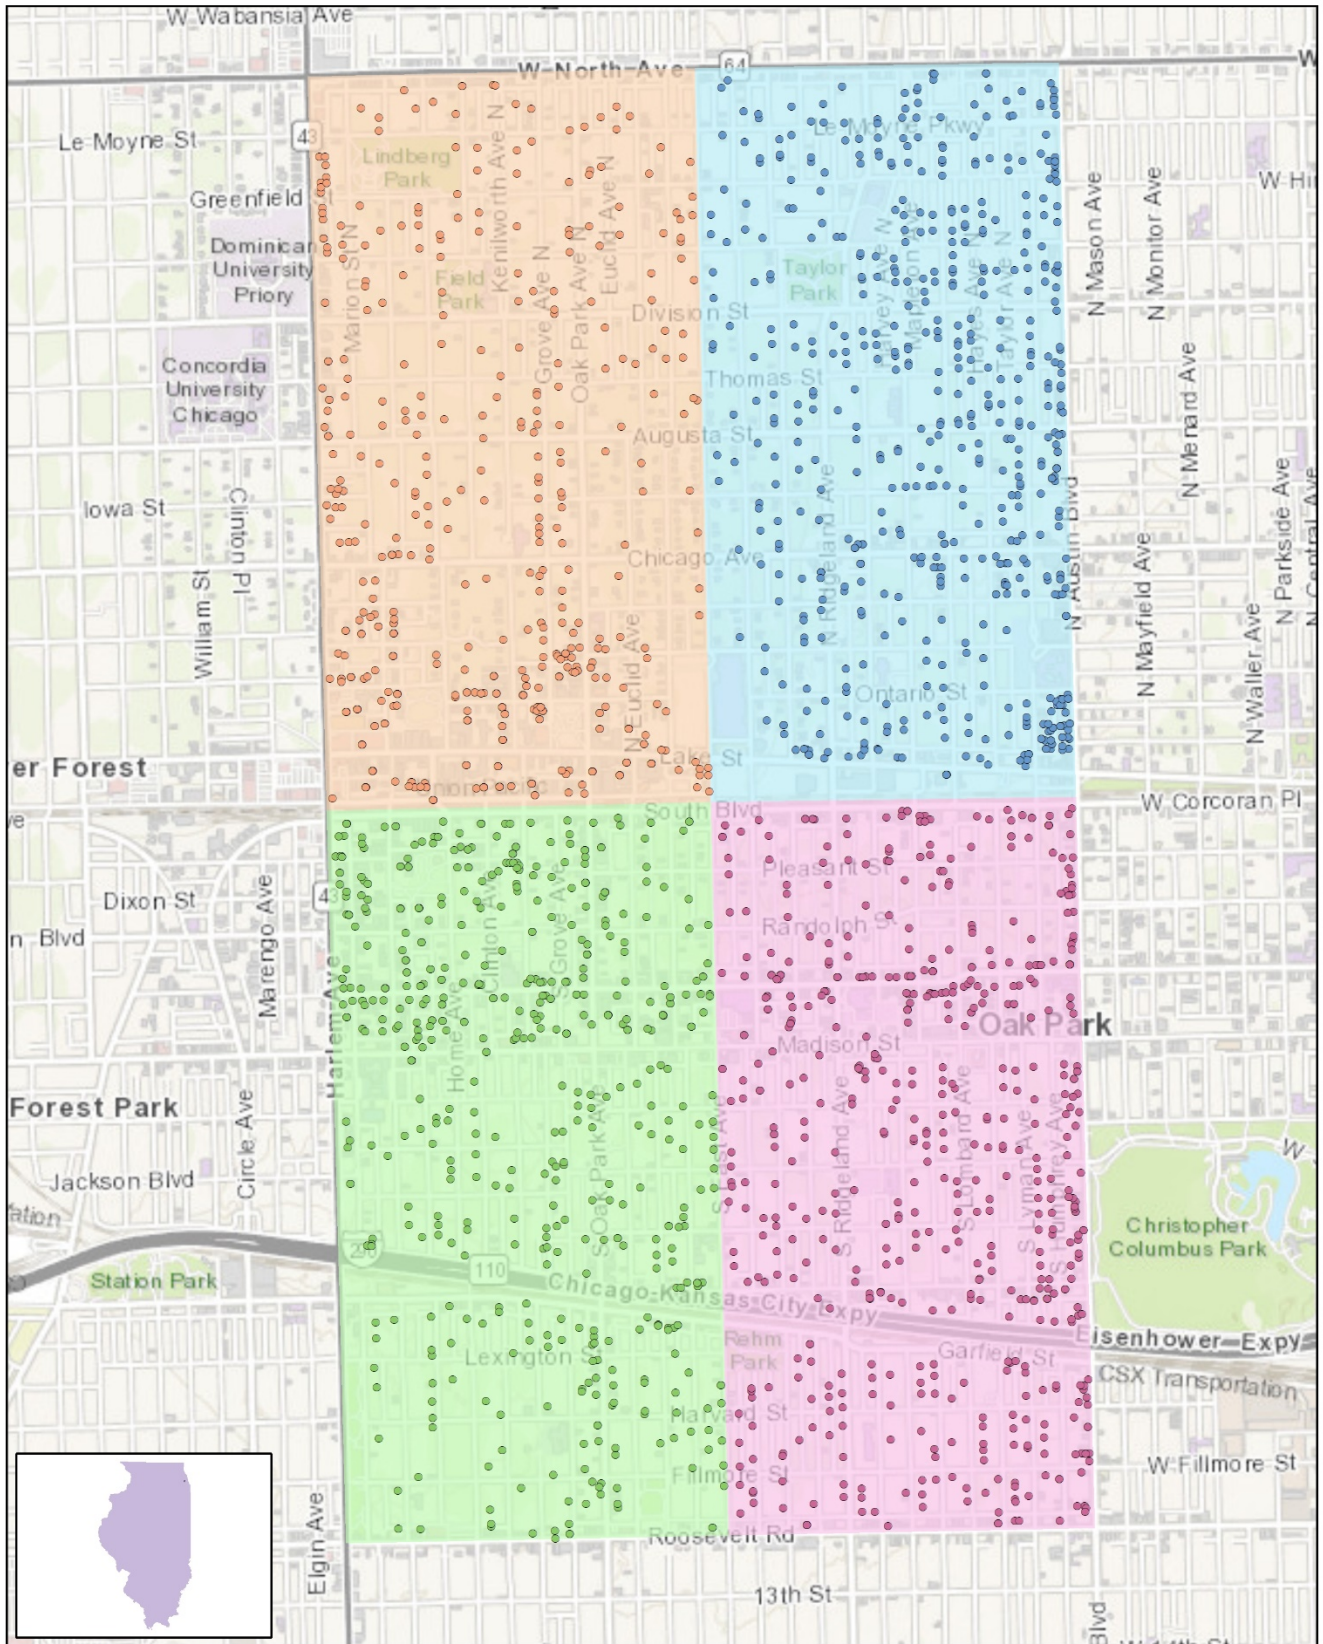

Selecting Survey Recipients

"Sampling" refers to the method by which households were chosen to receive the survey. All households within the Village of Oak Park were eligible to participate in the survey. A list of all households within the zip codes serving Oak Park was purchased from Go-Dog Direct based on updated listings from the United States Postal Service. Since some of the zip codes that serve the Village of Oak Park households may also serve addresses that lie outside of the community, the exact geographic location of each housing unit was compared to community boundaries using the most current municipal boundary file (updated on a quarterly basis) and addresses located outside of the Village of Oak Park boundaries were removed from consideration. Each address identified as being within Village boundaries was further identified as being within one of four quadrants (Northwest, Northeast, Southwest and Southeast).

To choose the 2,400 survey recipients, a systematic sampling method was applied to the list of households previously screened for geographic location. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every *Nth* one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were selected at a higher rate as residents of this type of housing typically respond at lower rates to surveys than do those in single-family housing units. Figure 1 displays a map of the households selected to receive the survey. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density). While the theory of probability assumes no bias in selection, there may be some minor variations in practice (meaning, an area with only 15% of the housing units might be selected at an actual rate that is slightly above or below that).

An individual within each household was selected using the birthday method. The birthday method selects a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

Survey Administration and Response

Selected households received three mailings, one week apart, beginning on September 25, 2019. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the Village President/Mayor inviting the household to participate, a questionnaire and a postage-paid return envelope. The final mailing contained a reminder letter, another survey and a postage-paid return envelope. The second cover letter asked those who had not completed the survey to do so and those who had already done so to refrain from turning in another survey. The survey was available in English. Both cover letters included a URL through which the residents selected for the mail survey could choose respond online rather than by mail, as well as unique identifiers to ensure duplicate responses could be tracked and removed from the dataset, if necessary. The Village of Oak Park chose to augment their administration of The NCS with several additional services, including demographic subgroup comparisons and geographic subgroup comparison. The results of these additional services have been provided under separate cover. Completed surveys were collected over the following seven weeks.

About 3% of the 2,400 surveys mailed were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the remaining 2,335 eligible households that received the survey, 696 completed the survey, providing an overall response rate of 30%. Of the 696 completed surveys, 210 were completed online. Additionally, responses were tracked by subarea; response rates by quadrant ranged from 27% to 34%. The response rates were calculated using AAPOR's response rate #2¹ for mailed surveys of unnamed persons.

Table 75: Survey Response Rates by Quadrant

	Northwest	Northeast	Southwest	Southeast	Overall
Total sample used	600	600	600	600	2,400
I=Complete Interviews	173	192	164	155	684
P=Partial Interviews	3	3	3	2	11
R=Refusal and break off	0	0	0	0	0
NC=Non Contact	0	0	0	0	0
O=Other	0	0	0	0	0
UH=Unknown household	0	0	0	0	0
UO=Unknown other	417	387	405	431	1,640
NE=Not eligible	7	18	28	12	65
Response rate: $(I+P)/(I+P) + (R+NC+O) + (UH+UO)$	30%	34%	29%	27%	30%

Confidence Intervals

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents’ opinions are relied on to estimate all residents’ opinions.²

The margin of error for the Village of Oak Park survey is no greater than plus or minus four percentage points around any given percent reported for all respondents (696 completed surveys).

For subgroups of responses, the margin of error increases because the number of respondents for the subgroup is smaller.

Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and “cleaned” as necessary. For example, a question may have asked a respondent to pick two items out

¹ See AAPOR's Standard Definitions here: [http://www.aapor.org/Standards-Ethics/Standard-Definitions-\(1\).aspx](http://www.aapor.org/Standards-Ethics/Standard-Definitions-(1).aspx) for more information

² A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the “true” population response. This theory is applied in practice to mean that the “true” perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents rate a service as “excellent” or “good,” then the 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of uncertainty is called sampling error. In addition to sampling error, other sources of error may affect any survey, including the non-response of residents with opinions different from survey responders. Though standardized on The NCS, on other surveys, differences in question wording, order, translation and data entry, as examples, can lead to somewhat varying results.

The National Community Survey™

of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

NRC used SurveyGizmo, a web-based survey and analytics platform, to collect the online survey data. Use of an online system means all collected data are entered into the dataset when the respondents submit the surveys. Skip patterns are programmed into system so respondents are automatically “skipped” to the appropriate question based on the individual responses being given. Online programming also allows for more rigid control of the data format, making extensive data cleaning unnecessary.

A series of quality control checks were also performed in order to ensure the integrity of the web data. Steps may include and not be limited to reviewing the data for clusters of repeat IP addresses and time stamps (indicating duplicate responses) and removing empty submissions (questionnaires submitted with no questions answered).

Survey Data Weighting

The demographic characteristics of the survey respondents were compared to those found in the 2010 Census and American Community Survey estimates for adults in the Village of Oak Park. The primary objective of weighting survey data is to make the survey respondents reflective of the larger population of the community. The characteristics used for weighting were housing tenure (rent or own), housing unit type (attached or detached), race/ethnicity, sex, age, and area. No adjustments were made for design effects. The results of the weighting scheme are presented in the following table.

Table 76: Oak Park, IL 2019 Weighting Table

Characteristic	Population Norm	Unweighted Data	Weighted Data
Housing			
Rent home	42%	20%	40%
Own home	58%	80%	60%
Detached unit*	43%	61%	44%
Attached unit*	57%	39%	56%
Race and Ethnicity			
White	69%	77%	68%
Not white	31%	23%	32%
Not Hispanic	94%	96%	95%
Hispanic	6%	4%	5%
Sex and Age			
Female	55%	59%	56%
Male	45%	41%	44%
18-34 years of age	27%	11%	25%
35-54 years of age	42%	36%	43%
55+ years of age	32%	54%	32%
Females 18-34	14%	7%	14%
Females 35-54	23%	20%	24%
Females 55+	18%	31%	18%
Males 18-34	12%	3%	11%
Males 35-54	19%	15%	19%
Males 55+	14%	23%	14%
Quadrant			
Northwest	17%	25%	18%
Northeast	25%	28%	25%
Southwest	25%	24%	25%
Southeast	32%	23%	31%

* U.S. Census Bureau ACS 2017 5-year estimates

Survey Data Analysis and Reporting

The survey dataset was analyzed using the Statistical Package for the Social Sciences (SPSS). For the most part, the percentages presented in the reports represent the “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “essential” and “very important,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month.

On many of the questions in the survey respondents may answer “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the reports. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

Appendix D: Survey Materials

Dear Oak Park Resident,

It won't take much of your time to make a big difference!

Your household has been randomly selected to participate in a survey about your community. Your survey will arrive in a few days.

Thank you for helping create a better Village!

Sincerely,

Anan Abu-Taleb
Village President/Mayor

October 2019

Dear Village of Oak Park Resident:

Please help us shape the future of Oak Park! You have been selected at random to participate in the 2019 Oak Park Community Survey.

Please take a few minutes to fill out the enclosed survey. Your participation in this survey is very important – especially since your household is one of only a small number being surveyed. Your feedback will help Oak Park make decisions that affect our Village.

A few things to remember:

- **Your responses are completely confidential.**
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- **You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online using the following link and access code:**

xx.webplaceholder.xx

Access Code: XXXXX

If you have any questions about the survey please call 708-358-5770.

Thank you for your time and participation!

Anan Abu-Taleb
Village President/Mayor

Village President/Mayor

The Village of Oak Park 2019 Community Survey

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Please select the response (by circling the number or checking the box) that most closely represents your opinion for each question. Your responses are anonymous and will be reported in group form only.

1. Please rate each of the following aspects of quality of life in Oak Park:

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Oak Park as a place to live.....	1	2	3	4	5
Your neighborhood as a place to live.....	1	2	3	4	5
Oak Park as a place to raise children.....	1	2	3	4	5
Oak Park as a place to work.....	1	2	3	4	5
Oak Park as a place to visit.....	1	2	3	4	5
Oak Park as a place to retire.....	1	2	3	4	5
The overall quality of life in Oak Park.....	1	2	3	4	5

2. Please rate each of the following characteristics as they relate to Oak Park as a whole:

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Overall feeling of safety in Oak Park.....	1	2	3	4	5
Overall ease of getting to the places you usually have to visit.....	1	2	3	4	5
Quality of overall natural environment in Oak Park.....	1	2	3	4	5
Overall "built environment" of Oak Park (including overall design, buildings, parks and transportation systems).....	1	2	3	4	5
Health and wellness opportunities in Oak Park.....	1	2	3	4	5
Overall opportunities for education and enrichment.....	1	2	3	4	5
Overall economic health of Oak Park.....	1	2	3	4	5
Sense of community.....	1	2	3	4	5
Overall image or reputation of Oak Park.....	1	2	3	4	5

3. Please indicate how likely or unlikely you are to do each of the following:

	<i>Very likely</i>	<i>Somewhat likely</i>	<i>Somewhat unlikely</i>	<i>Very unlikely</i>	<i>Don't know</i>
Recommend living in Oak Park to someone who asks.....	1	2	3	4	5
Remain in Oak Park for the next five years.....	1	2	3	4	5

4. Please rate how safe or unsafe you feel:

	<i>Very safe</i>	<i>Somewhat safe</i>	<i>Neither safe nor unsafe</i>	<i>Somewhat unsafe</i>	<i>Very unsafe</i>	<i>Don't know</i>
In your neighborhood during the day.....	1	2	3	4	5	6
In Oak Park's downtown/commercial area during the day.....	1	2	3	4	5	6
In your neighborhood after dark.....	1	2	3	4	5	6
In Oak Park's downtown/commercial area after dark.....	1	2	3	4	5	6

5. Please rate each of the following characteristics as they relate to Oak Park as a whole:

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Traffic flow on major streets.....	1	2	3	4	5
Ease of public parking.....	1	2	3	4	5
Ease of travel by car in Oak Park.....	1	2	3	4	5
Ease of travel by bicycle in Oak Park.....	1	2	3	4	5
Ease of walking in Oak Park.....	1	2	3	4	5
Availability of paths and walking trails.....	1	2	3	4	5
Air quality.....	1	2	3	4	5
Cleanliness of Oak Park.....	1	2	3	4	5
Overall appearance of Oak Park.....	1	2	3	4	5
Public places where people want to spend time.....	1	2	3	4	5
Variety of housing options.....	1	2	3	4	5
Availability of affordable quality housing.....	1	2	3	4	5
Fitness opportunities (including exercise classes and paths or trails, etc.).....	1	2	3	4	5
Recreational opportunities.....	1	2	3	4	5
Availability of affordable quality food.....	1	2	3	4	5
Availability of affordable quality health care.....	1	2	3	4	5
Availability of preventive health services.....	1	2	3	4	5
Availability of affordable quality mental health care.....	1	2	3	4	5
Ease of travel by bus in Oak Park.....	1	2	3	4	5
Ease of travel by rail in Oak Park.....	1	2	3	4	5

6. Please rate each of the following characteristics as they relate to Oak Park as a whole:

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Availability of affordable quality child care/preschool.....	1	2	3	4	5
Adult educational opportunities.....	1	2	3	4	5
Opportunities to attend cultural/arts/music activities	1	2	3	4	5
Opportunities to participate in religious or spiritual events and activities	1	2	3	4	5
Employment opportunities	1	2	3	4	5
Shopping opportunities.....	1	2	3	4	5
Cost of living in Oak Park.....	1	2	3	4	5
Overall quality of business and service establishments in Oak Park	1	2	3	4	5
Vibrant downtown/commercial area	1	2	3	4	5
Overall quality of new development in Oak Park.....	1	2	3	4	5
Opportunities to participate in social events and activities	1	2	3	4	5
Opportunities to volunteer.....	1	2	3	4	5
Opportunities to participate in community matters	1	2	3	4	5
Openness and acceptance of the community toward people of diverse backgrounds	1	2	3	4	5
Neighborliness of residents in Oak Park	1	2	3	4	5

7. Please indicate whether or not you have done each of the following in the last 12 months.

	<i>No</i>	<i>Yes</i>
Made efforts to conserve water	1	2
Made efforts to make your home more energy efficient	1	2
Observed a code violation or other hazard in Oak Park (weeds, abandoned buildings, etc.).....	1	2
Household member was a victim of a crime in Oak Park	1	2
Reported a crime to the police in Oak Park	1	2
Stocked supplies in preparation for an emergency	1	2
Campaigned or advocated for an issue, cause or candidate	1	2
