**COVID-19 Status Report  
Oak Park Village Board of Trustees**

To: Village President and Village Board of Trustees

Fr: Lisa Shelley, Interim Village Manager

The memo is a weekly status report presented Wednesdays and provides a brief summary of information regarding Village of Oak Park operational activities in response to COVID-19.

The Oak Park Health Department is working with the Village Manager's office on ideas to change the report for the 2022 calendar year. Data elements and formatting are subject to change until new reporting structure is finalized.

**New COVID-19 Cases**

The Village of Oak Park Department of Public Health received official notification of 569 COVID-19 cases from January 13, 2022 to January 18, 2022. This is a 47.3% decrease over the last 7-day period, and a 70.9% increase over the cases 30 days ago.

**COVID-19 Community Transmission Rates**

Based on the positives cases reported to the Village of Oak Park, for the week of January 13-18, our weekly COVID-19 rate of 1,044 cases per 100,000 placed us in high community transmission range.

These numbers do not reflect those who tested positive using at home self-administered test. At-home test must be confirmed at an official testing site (pharmacy, physician office, health department, school, etc.) so that information can be transferred to the health department. Official test results are used to track the amount of virus in the community and release people who test positive from isolation. The health department cannot provide any resident with a release from isolation without an official notification of their COVID-19 positive status.

**Test Positivity Rates**

The test positivity rate for Oak Park as of January 18th is 6.48%, representing an 36.7% decrease from the previous week. The test positivity rate for the region was 13.4% on January 15th, representing a 21.2% decrease from the previous week.

Illinois considers a positivity rate above 8% as high. The test positivity rate is impacted by address/zip code given at time of testing and could be undercounted as a result of the high amount of missing data.

### ICU Hospitalizations

Oak Park residents utilize hospitals across our region. The state reports 9% ICU hospital bed availability at this time; anything under 20% of ICU hospital bed availability places a region in “warning” level.

### Deaths

There were 0 reported deaths to residents from COVID-19 in the community for this time period.

### Oak Park Residents Vaccinated January 18, 2022

Oak Park is holding steady at 87% of residents receiving their first dose and 79% completing their primary vaccination series.

### Age Range Data

Oak Park residents who tested positive for COVID-19 ranged in age from infancy to 99 years.

Age Range	Cases 1/13-1/18	% of Cases 1/3-1/18
0-4	43	7.5%
5-13	108	19.0%
14-19	51	9.0%
20-29	66	11.6%
30-39	94	16.5%
40-49	78	13.7%
50-59	68	12.0%
60-69	33	5.8%
70-79	17	3.0%
80-89	9	1.6%
90-99	2	0.4%
Unknown	0	0%
Total	569
