The NCS™ is presented by NRC in collaboration with ICMA.

NRC is a charter member of the AAPOR Transparency Initiative, providing clear disclosure of our sound and ethical survey research practices.

# About

The National Citizen Survey™ (The NCS) report is about the “livability” of Oak Park. The phrase “livable community” is used here to evoke a place that is not simply habitable, but that is desirable. It is not only where people do live, but where they want to live.

Great communities are partnerships of the government, private sector, community-based organizations and residents, all geographically connected. The NCS captures residents’ opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement).

The Community Livability Report provides the opinions of a representative sample of 476 residents of the Village of Oak Park. The margin of error around any reported percentage is 5% for all respondents. The full description of methods used to garner these opinions can be found in the *Technical Appendices* provided under separate cover.

# Quality of Life in Oak Park

Most residents rated the quality of life in Oak Park as excellent or good. This rating was similar to the national benchmark comparison (see Appendix B of the *Technical Appendices* provided under separate cover).

Shown below are the eight facets of community. The color of each community facet summarizes how residents rated it across the three sections of the survey that represent the pillars of a community – Community Characteristics, Governance and Participation. When most ratings across the three pillars were higher than the benchmark, the color for that facet is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

In addition to a summary of ratings, the image below includes one or more stars to indicate which community facets were the most important focus areas for the community. Residents identified Safety and Economy as priorities for the Oak Park community in the coming two years. Ratings for all facets were positive and similar to other communities. This overview of the key aspects of community quality provides a quick summary of where residents see exceptionally strong performance and where performance offers the greatest opportunity for improvement. Linking quality to importance offers community members and leaders a view into the characteristics of the community that matter most and that seem to be working best.

Details that support these findings are contained in the remainder of this Livability Report, starting with the ratings for Community Characteristics, Governance and Participation and ending with results for Oak Park’s unique questions.

★ Most important

# Community Characteristics

*What makes a community livable, attractive and a place where people want to be?*

Overall quality of community life represents the natural ambience, services and amenities that make for an attractive community. How residents rate their overall quality of life is an indicator of the overall health of a community. In the case of Oak Park, 9 in 10 residents rated the Village as an excellent or good place to live. Respondents' ratings of Oak Park as a place to live were similar to ratings in other communities across the nation.

In addition to rating the Village as a place to live, respondents rated several aspects of community quality including Oak Park as a place to raise children and to retire, their neighborhood as a place to live, the overall image or reputation of Oak Park and its overall appearance. About 85% of respondents or more gave excellent or good ratings to Oak Park as a place to raise children, their neighborhood as a place to live, the overall appearance and the overall image of Oak Park; these ratings were either similar to or higher than the national averages. Just under half of respondents offered these same evaluations to Oak Park as a place to retire, which was a rating lower than the national average and lower when compared to ratings given in 2015 (see *The NCS Trends over Time – Oak Park 2017* report under separate cover).

Delving deeper into Community Characteristics, survey respondents rated over 40 features of the community within the eight facets of Community Livability. While most Community Characteristics tended to be rated similar to the national comparisons, residents praised eight characteristics as being higher than the national average and

three of the eight were within the facet of Community Engagement (social events and activities, openness and acceptance and opportunities to participate in community matters). Four characteristics were given ratings that were lower than the national comparisons (ease of travel by car, public parking, affordable quality housing and cost of living). Ratings within Mobility varied with 26% of residents offering positive evaluations to public parking to 87% offering these same evaluations to ease of walking (a rating higher than the national comparison). Each aspect of Recreation and Wellness was strong and similar to the national comparisons with at least 6 in 10 residents offering positive evaluations.

# Governance

*How well does the government of Oak Park meet the needs and expectations of its residents?*

The overall quality of the services provided by Oak Park as well as the manner in which these services are provided is a key component of how residents rate their quality of life. Residents' ratings for Oak Park's quality of services were similar to the national benchmark with three-quarters of respondents rating them as excellent or good.

Survey respondents also rated various aspects of Oak Park's leadership and governance, which tended to be evaluated similar to the national benchmark. Roughly 7 in 10 residents gave excellent or good marks to the customer service provided by Village employees, while between 4 in 10 and 5 in 10 residents felt positively about each of the other aspects of leadership and governance included on the survey. For a number of the leadership questions there was a decline in resident ratings since the survey was last administered in 2015: overall direction, welcoming resident involvement, confidence in Village government, working in residents' best interest and being honest. While these may be one time 'blips' in the trend, they are worth watching.

**Overall Quality of Village Services**

Respondents evaluated over 30 individual services and amenities available in Oak Park. Governance ratings were largely similar to the national comparisons but three services and amenities were rated higher than the national comparisons (bus or transit services, recreation centers and public libraries). While all seven Safety services were similar to the national averages, police services, fire services and EMS services topped the list with about 9 in 10 residents offering positive reviews and emergency preparedness was at the bottom of the list with 6 in 10 residents offering positive reviews. Ratings of Natural Environment services were generally strong with the highest ratings going to garbage collection, recycling, yard waste pick-up and drinking water and the lowest ratings going to natural areas preservation and open space. Land use, planning and zoning within Built Environment was the only service that received an excellent or good rating from fewer than half of residents. Nevertheless this rating was similar to

those given across the U.S.

# Participation

*Are the residents of Oak Park connected to the community and each other?*

An engaged community harnesses its most valuable resource, its residents. The connections and trust among residents, government, businesses and other organizations help to create a sense of community, a shared sense of membership, belonging and history. A majority of respondents rated the sense of community in Oak Park as excellent or good, a rating higher than the benchmark comparison. About 9 in 10 residents recommended living in Oak Park and 8 in 10 residents reported they were somewhat or very likely to remain in the village. Recommending the community and the likelihood of remaining in the community were both similar to ratings given in communities across the nation.

The survey included over 30 activities and behaviors for which respondents indicated how often they participated in or performed each, if at all. While various participation rates were higher than the national averages or lower than the national averages, those related to Natural Environment, Recreation and Wellness and Community Engagement were all similar. Within Mobility, more Oak Park residents than residents of other communities across the county used public transportation instead of driving and walked or biked instead of driving. Oak Park residents were also more likely to have used public libraries and indicated lower rates of observing code violations; however, lower rates of participation were seen for stocking supplies for an emergency and working in Oak Park compared to other communities across the nation. Community Engagement ratings varied with 2 in 10 respondents having contacted elected officials or watched a local public meeting while 9 in 10 had talked to or visited with neighbors, read or watched local news and voted in local elections. Within Natural Environment, about three-quarters of residents had conserved water or made their home more energy efficient while 9 in 10 residents had recycled at home (all rates of participation were similar to national averages).

# Special Topics

The Village of Oak Park included four questions of special interest on The NCS. The first question asked respondents to rate the importance of Oak Park to maintain several different services at least at current levels. All of the services were rated as essential or very important to be maintained by at least half of residents. At least 9 in 10 residents rated police protection, fire and emergency medical services and maintenance of the public way, street cleaning, and snow plowing as essential or very important.

In part, the data confirm the importance of core services – roads, fire/EMS and police - but they also give insight into priorities for the other (non- core) services which range in importance from landscaping and business support to parking service and partnerships.

Figure 4: Importance of Maintaining Current Service Levels

*Please rate how important, if at all, it is for the Village of Oak Park to maintain each of the following services at least at current levels (as compared with cutting the levels of service):*

## The National Citizen Survey™

The second question asked residents to indicate how much of a problem, if at all, several issues were in Oak Park. A majority rated all of the items as at least a minor problem but for none did even a quarter of residents conclude there was a major problem. About 9 in 10 residents indicated that traffic and crime were at least minor problems in Oak Park.

Figure 5: Problems in Oak Park

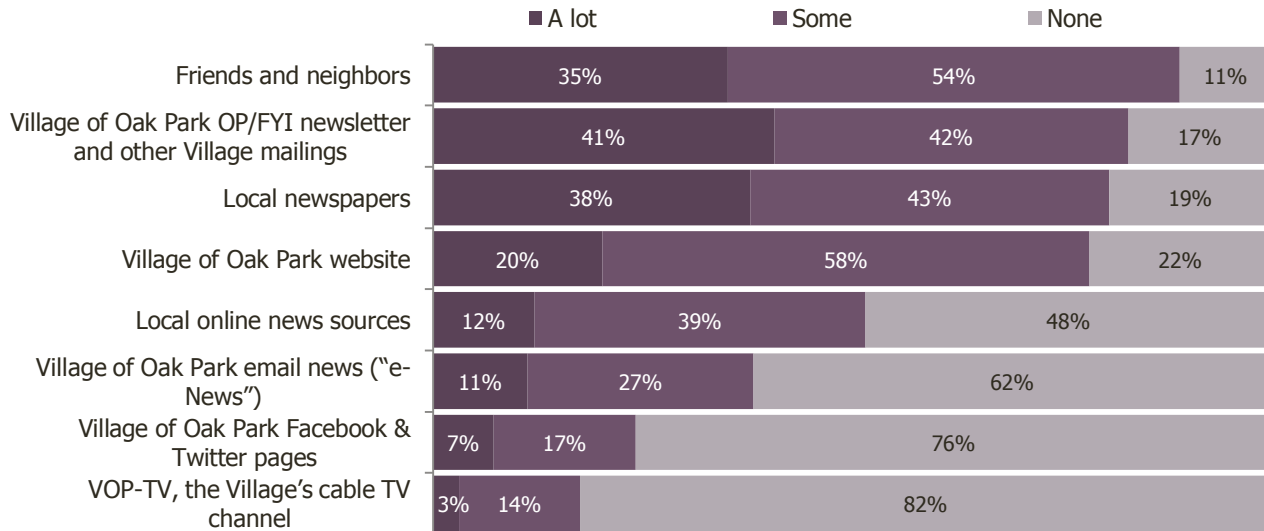

*To what degree, if at all, is each of the following a problem in Oak Park?*

The third question asked respondents to rate how much they used different information sources to get information about Oak Park. Most respondents got at least some of their information from the Village of Oak Park website, local newspapers, Village of Oak Park newsletter and other Village mailings and friends and neighbors. Fewer residents indicated that local online news sources, the Village of Oak Park email news, the Village's Facebook and Twitter pages and VOP-TV were information sources for them.

Figure 6: Information Sources

*How much information about Oak Park, if any, do you get from each of the following sources?*

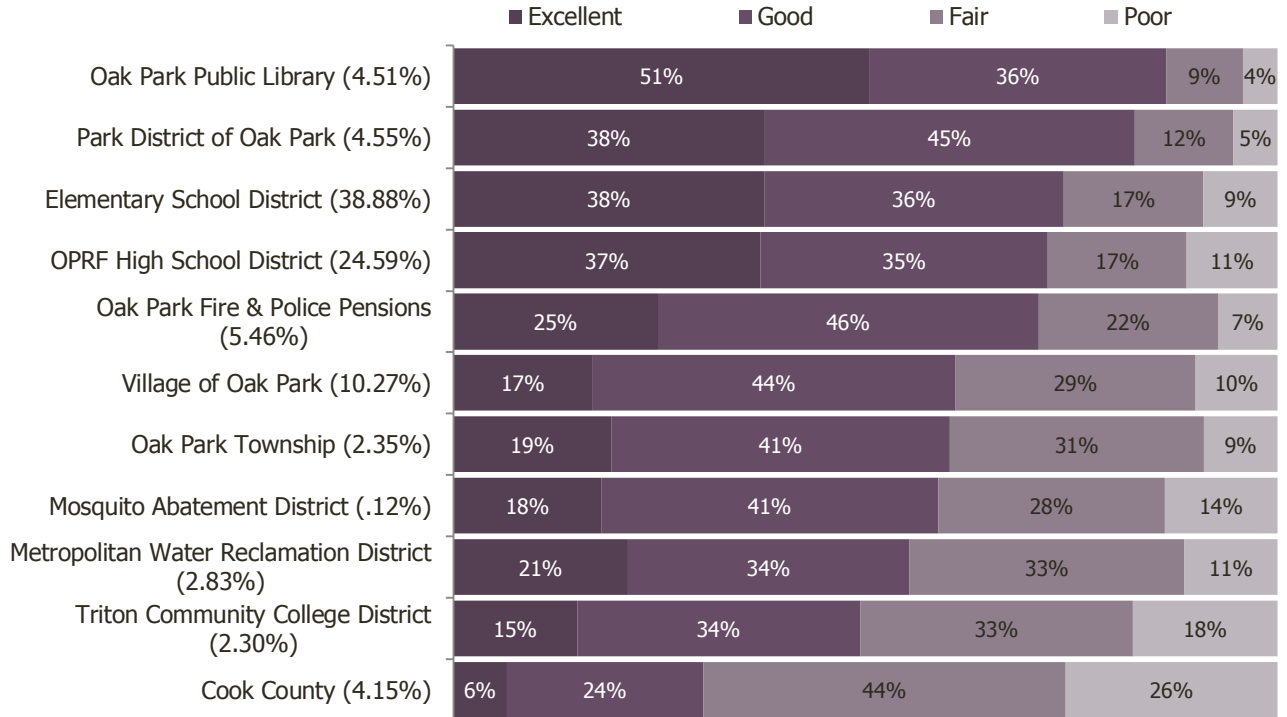

## The National Citizen Survey™

The final custom questions asked residents to rate the value of services received for property taxes paid. Most services received positive ratings by a majority of respondents. Oak Park Public Library and the Park District of Oak Park received the most positive ratings, while the value of services for the taxes paid to Cook County received the lowest ratings.

Figure 7: Value of Services for Property Taxes Paid

*Please rate the value of services for the taxes paid to each of the following (percent of your property tax bill):*

# Conclusions

## **Oak Park residents continue to enjoy a high quality of life and feel safe.**

Most Oak Park residents feel their overall quality of life was excellent or good and would be likely to remain in Oak Park for the next five years. Additionally, about 9 in 10 residents would be likely to recommend the community to others. About 9 in 10 residents rated Oak Park as an excellent or good place to live and at least three-quarters of respondents rated Oak Park as a place to raise children, their neighborhood as a place to live, the overall image or reputation of Oak Park and its overall appearance positively; all ratings that were similar to or higher than the national benchmarks.

Survey participants not only prioritized the facet of Safety for Oak Park to focus on in the coming years, but also rated aspects of this facet positively and similar to the national averages. Residents feel safe in general, as well as in their neighborhood and in the downtown/commercial area. Safety service ratings were strong and similar to the national averages and about 7 in 10 residents indicated they had not reported a crime and 9 in 10 had not been the victim of a crime.

## **Oak Park residents appreciate opportunities to participate in community matters but ratings for local leadership and governance are declining.**

Oak Park residents continued to be active and engaged in their community. About 9 in 10 residents reported that they had talked to or visited with neighbors, read or watched local news and voted in local elections and more residents in 2017 compared to 2015 reported that they had campaigned for an issue, cause or candidate. At least three-quarters of residents offered positive evaluations of opportunities to participate in social events and activities, opportunities to participate in community matters and the openness and acceptance of the community toward people of diverse backgrounds; each of these aspects was rated higher than the national averages. Ratings were generally similar to the national averages for Oak Park's overall direction, welcoming citizen involvement, confidence in Village government, acting in the best interest of Oak Park, being honest, however, these ratings were lower in 2017 when compared to ratings given in 2015.

## **Oak Park's Economy continues to be a top priority.**

As in 2015, Economy was rated as a top priority for the Oak Park community to focus on in the next two years. Ratings within the facet of Economy tended to be positive and similar to ratings in comparison communities. The highest rated aspects of Economy were Oak Park as a place to visit (83%) and Oak Park's vibrant downtown/commercial area (71%); these ratings were higher than the national benchmarks. Ratings for cost of living in Oak Park (16%) were lower than the national benchmark, meaning that costs were perceived to be high. Most Economy ratings remained stable from 2015 to 2017; however, ratings decreased for employment opportunities, cost of living, Oak Park as a place to work from 2015 to 2017.

# Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents’ opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Oak Park’s performance in the eight facets of community livability with the “General” rating as a summary of results from the overarching questions not shown within any of the eight facets. The “Overall” represents the community pillar in its entirety (the eight facets and general). This information can be helpful in identifying the areas that merit more attention.

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Oak Park’s community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Overall, ratings for each facet within each pillar tended to be similar to the benchmark. Community Engagement ratings within the pillar of Community Characteristics tended to be higher than the benchmark and ratings of Education and Enrichment within the pillar of Governance tended to be higher than the benchmark. For the facets of Mobility and the Built Environment, ratings in the pillar of participation tended to be higher than the benchmark.

# Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report discusses trends over time, comparing the 2017 ratings for the Village of Oak Park to its previous survey results in 2000, 2004, 2008, 2011, 2013 and 2015. Additional reports and technical appendices are available under separate cover.

Trend data for Oak Park represent important comparisons and should be examined for improvements or declines. Deviations from stable trends over time, especially, represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Meaningful differences between that last two survey years have been noted within the following tables as being "higher" or "lower" if the differences are greater than seven percentage points, otherwise the comparisons between 2015 and 2017 are noted as being "similar." Additionally, benchmark comparisons for all survey years are presented for reference. Changes in the benchmark comparison over time can be impacted by various trends, including varying survey cycles for the individual communities that comprise the benchmarks, regional and national economic or other events, as well as emerging survey methodologies.

Overall, ratings in Oak Park for 2017 generally remained stable. Of the 131 items for which comparisons were available, 98 items were rated similarly in 2015 and 2017, 27 items showed a decrease in ratings and six showed an increase in ratings. Notable trends over time included the following:

- Ratings that increased were spread across each facet within the pillars of Community Characteristics and Governance. The facets of Built Environment and Community Engagement each accounted for 5 decreases from 2015 to 2017. Aspects of Built Environment that decreased include affordable quality housing, housing options, overall built environment, land use planning and zoning and code enforcement. Within Community Engagement, ratings decreased for Oak Park's overall direction, welcoming citizen involvement, confidence in Village government, acting in the best interest of Oak Park and being honest.
- Within Mobility, ratings for street repair, street leaning and snow removal increased in 2017 compared to 2015; however, the rating for traffic enforcement, traffic flow, ease of travel by car and overall ease of travel decreased.
- Fewer residents offered positive evaluations of cost of living, employment opportunities and Oak Park as a place to work in 2017 compared to 2015.

# Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. This report discusses differences in opinion of survey respondents by length of residency in Oak Park, housing tenure, annual household income, presence of an adult 65 years or older in home, race, age and gender of respondent.

Responses in the following tables show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who attended a public meeting more than once a month. ANOVA and chi-square tests of significance were applied to these comparisons of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between subgroups are due to chance; or in other words, a greater than 95% probability that the differences observed are “real.” Where differences were statistically significant, they have been shaded grey.

The margin of error for all respondents (476 completed surveys) is generally no greater than plus or minus five percentage points around any given percent. The margin of error for subgroups is less precise. For subgroups of approximately 100 respondents, the margin of error is plus or minus 10 percentage points.

Notable differences between demographic subgroups included the following:

- Where differences emerged, residents who had lived in the community five years or less were more likely to favorably rate Community Characteristics than those who had lived in the community for more than five years (e.g. overall appearance of Oak Park, ease of travel by bus, overall quality of new development, etc.).
- Across most facets, residents who owned their home were more likely to report higher rates of participation compared to residents who rented their home (e.g. higher rates of voting in local elections, attending a Village-sponsored event, using the recreation centers, etc.).
- Where gender differences emerged, female respondents tended to give better evaluations to Community Characteristics and to aspects of Governance than did their male counterparts; however, male respondents were more likely to positively rate aspects of local governance and leadership than were females (Oak Park generally acting in the best interest of the community and treating all residents fairly).

The National Citizen Survey™

Table 1: Community Characteristics - General

Percent rating positively (e.g., excellent/good)	Number of years in Oak Park			Rent or own		Annual household income			Overall
	5 years or less	6 to 20 years	More than 20 years	Rent	Own	Less than \$49,999	\$50,000 to \$99,999	\$100,000 or more

# Summary

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. This report discusses differences in opinion of survey respondents by geographic quadrant.

Responses in the following tables show only the proportion of respondents giving a certain answer; for example, the percent of respondents who rated the quality of life as “excellent” or “good,” or the percent of respondents who attended a public meeting more than once a month. ANOVA and chi-square tests of significance were applied to these comparisons of survey questions. A “p-value” of 0.05 or less indicates that there is less than a 5% probability that differences observed between quadrants are due to chance; or in other words, a greater than 95% probability that the differences observed are “real.” Where differences were statistically significant, they have been shaded grey.

The margin of error for all respondents (476 completed surveys) is generally no greater than plus or minus five percentage points around any given percent. The margin of error for subgroups is less precise. For subgroups of approximately 100 respondents, the margin of error is plus or minus 10 percentage points. Four quadrants were tracked for comparison and the number of completed surveys for each are in the figure below. (Please see *Technical Appendices* provided under separate cover for a map of the four quadrants.)

Figure 1: Geographic Areas

Quadrant	Number of Completed Surveys
Northwest	116
Northeast	122
Southeast	122
Southwest	116

Notable differences between quadrants included the following:

- Residents living in the Southwest quadrant of Oak Park tended to give lower quality ratings than residents in other quadrants to various characteristics of the community such as overall quality of life, overall image or reputation of Oak Park, Oak Park as a place to raise children and as a place to retire.
- Few differences emerged related to aspects of local leadership and governance; however, those residing in the Northeast quadrant offered the strongest ratings for the value of services for the taxes paid to Oak Park and to the overall direction that Oak Park is taking.
- Participation ratings were mixed across geographic quadrants; residents living in the Southeast quadrant were least likely to have reported a crime or feel the economy would have a positive impact on their income but most likely to have participated in moderate or vigorous physical activity.

The National Citizen Survey™

Table 1: Community Characteristics - General

Percent rating positively (e.g., excellent/good)	Quadrant				Overall
	Northwest	Northeast	Southeast	Southwest	
The overall quality of life in Oak Park	86%	89%	92%	74%	84%
Overall image or reputation of Oak Park	86%	93%	88%	77%	85%
Oak Park as a place to live	89%	94%	92%	85%	90%
Your neighborhood as a place to live	94%	86%	85%	82%	87%
Oak Park as a place to raise children	94%	93%	94%	82%	90%
Oak Park as a place to retire	54%	60%	44%	36%	47%
Overall appearance of Oak Park	90%	91%	89%	81%	87%

Table 2: Community Characteristics - Safety

Percent rating positively (e.g., excellent/good, very/somewhat safe)	Quadrant				Overall
	Northwest	Northeast	Southeast	Southwest	
Overall feeling of safety in Oak Park	81%	76%	71%	80%	77%
In your neighborhood during the day	98%	91%	93%	84%	91%
In Oak Park's downtown/commercial area during the day	94%	95%	95%	90%	93%
In your neighborhood after dark	78%	56%	66%	71%	69%
In Oak Park's downtown/commercial area after dark	73%	78%	80%	72%	75%

Table 3: Community Characteristics - Mobility

Percent rating positively (e.g., excellent/good, very/somewhat safe)	Quadrant				Overall
	Northwest	Northeast	Southeast	Southwest	
Overall ease of getting to the places you usually have to visit	69%	70%	67%	75%	71%
Traffic flow on major streets	25%	30%	35%	37%	32%
Ease of public parking	30%	26%	23%	27%	26%
Ease of travel by car in Oak Park	40%	41%	50%	47%	45%
Ease of travel by bicycle in Oak Park	62%	64%	70%	65%	66%
Ease of walking in Oak Park	89%	87%	86%	88%	87%
Availability of paths and walking trails	54%	61%	50%	60%	56%
Ease of travel by bus in Oak Park	60%	74%	55%	52%	59%
Ease of travel by rail in Oak Park	92%	92%	82%	86%	87%

# Appendix A: Complete Survey Responses

## Responses excluding “don’t know”

The following pages contain a complete set of responses to each question on the survey, excluding the “don’t know” responses. The percent of respondents giving a particular response is shown followed by the number of respondents (denoted with “N=”).

Table 1: Question 1

Please rate each of the following aspects of quality of life in Oak Park:	Excellent		Good		Fair		Poor		Total	
Oak Park as a place to live	46%	N=219	43%	N=203	9%	N=42	2%	N=8	100%	N=472
Your neighborhood as a place to live	45%	N=212	42%	N=197	12%	N=56	2%	N=8	100%	N=472
Oak Park as a place to raise children	54%	N=219	36%	N=148	7%	N=29	3%	N=13	100%	N=409
Oak Park as a place to work	19%	N=56	38%	N=110	29%	N=86	14%	N=41	100%	N=293
Oak Park as a place to visit	37%	N=166	46%	N=203	16%	N=70	1%	N=6	100%	N=444
Oak Park as a place to retire	19%	N=66	28%	N=95	27%	N=94	26%	N=88	100%	N=342
The overall quality of life in Oak Park	34%	N=160	50%	N=234	14%	N=65	2%	N=8	100%	N=467

Table 2: Question 2

Please rate each of the following characteristics as they relate to Oak Park as a whole:	Excellent		Good		Fair		Poor		Total	
Overall feeling of safety in Oak Park	21%	N=100	56%	N=265	20%	N=95	3%	N=13	100%	N=473
Overall ease of getting to the places you usually have to visit	23%	N=110	47%	N=223	24%	N=114	5%	N=24	100%	N=471
Quality of overall natural environment in Oak Park	32%	N=149	53%	N=249	12%	N=57	3%	N=15	100%	N=471
Overall "built environment" of Oak Park (including overall design, buildings, parks and transportation systems)	22%	N=106	49%	N=232	22%	N=106	6%	N=27	100%	N=471
Health and wellness opportunities in Oak Park	30%	N=128	53%	N=225	15%	N=64	2%	N=10	100%	N=427
Overall opportunities for education and enrichment	42%	N=184	41%	N=177	15%	N=66	2%	N=9	100%	N=436
Overall economic health of Oak Park	19%	N=77	49%	N=202	23%	N=94	9%	N=36	100%	N=409
Sense of community	31%	N=140	45%	N=205	19%	N=85	5%	N=21	100%	N=451
Overall image or reputation of Oak Park	44%	N=202	41%	N=191	12%	N=56	3%	N=14	100%	N=462

Table 3: Question 3

Please indicate how likely or unlikely you are to do each of the following:	Very likely		Somewhat likely		Somewhat unlikely		Very unlikely		Total	
Recommend living in Oak Park to someone who asks	53%	N=249	34%	N=161	6%	N=30	7%	N=31	100%	N=470
Remain in Oak Park for the next five years	51%	N=230	30%	N=134	9%	N=41	11%	N=49	100%	N=455

Table 4: Question 4

Please rate how safe or unsafe you feel:	Very safe		Somewhat safe		Neither safe nor unsafe		Somewhat unsafe		Very unsafe		Total	
In your neighborhood during the day	61%	N=286	30%	N=143	6%	N=26	3%	N=14	0%	N=2	100%	N=471
In Oak Park’s downtown/commercial area during the day	66%	N=312	27%	N=127	4%	N=18	2%	N=12	1%	N=3	100%	N=472
In your neighborhood after dark	23%	N=108	45%	N=211	13%	N=59	16%	N=73	3%	N=14	100%	N=465
In Oak Park’s downtown/commercial area after dark	34%	N=157	41%	N=191	14%	N=63	10%	N=46	1%	N=5	100%	N=462

Do you consider a cell phone or landline your primary telephone number?	Percent	Number
Cell	68%	N=318
Land line	15%	N=71
Both	17%	N=77
Total	100%	N=467

## Appendix B: Benchmark Comparisons

### Comparison Data

NRC’s database of comparative resident opinion is comprised of resident perspectives gathered in surveys from over 500 communities whose residents evaluated the same kinds of topics on The National Citizen Survey™. The comparison evaluations are from the most recent survey completed in each community; most communities conduct surveys every year or in alternating years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. The Village of Oak Park chose to have comparisons made to the entire database.

### Interpreting the Results

Ratings are compared when there are at least five communities in which a similar question was asked. Where comparisons are available, four columns are provided in the table. The first column is Oak Park’s “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month. The second column is the rank assigned to Oak Park’s rating among communities where a similar question was asked. The third column is the number of communities that asked a similar question. The final column shows the comparison of Oak Park’s rating to the benchmark.

In that final column, Oak Park’s results are noted as being “higher” than the benchmark, “lower” than the benchmark or “similar” to the benchmark, meaning that the average rating given by Oak Park residents is statistically similar to or different (greater or lesser) than the benchmark. More extreme differences are noted as “much higher” or “much lower.”

Benchmark Database Characteristics	
Region	Percent
New England	3%
Middle Atlantic	5%
East North Central	15%
West North Central	13%
South Atlantic	22%
East South Central	3%
West South Central	7%
Mountain	16%
Pacific	16%
Population	Percent
Less than 10,000	10%
10,000 to 24,999	22%
25,000 to 49,999	23%
50,000 to 99,999	22%
100,000 or more	23%

## Appendix C: Detailed Survey Methods

The National Citizen Survey (The NCS™), conducted by National Research Center, Inc., was developed to provide communities an accurate, affordable and easy way to assess and interpret resident opinion about important local topics. Standardization of common questions and survey methods provide the rigor to assure valid results, and each community has enough flexibility to construct a customized version of The NCS.

Results offer insight into residents' perspectives about the community as a whole, including local amenities, services, public trust, resident participation and other aspects of the community in order to support budgeting, land use and strategic planning and communication with residents. Resident demographic characteristics permit comparison to the Census as well as comparison of results for different subgroups of residents. The Village of Oak Park funded this research. Please contact Powers, David of the Village of Oak Park at [dpowers@oak-park.us](mailto:dpowers@oak-park.us) if you have any questions about the survey.

### Survey Validity

The question of survey validity has two parts: 1) how can a community be confident that the results from those who completed the questionnaire are representative of the results that would have been obtained had the survey been administered to the entire population? and 2) how closely do the perspectives recorded on the survey reflect what residents really believe or do?

To answer the first question, the best survey research practices were used for the resources spent to ensure that the results from the survey respondents reflect the opinions of residents in the entire community. These practices include:

- Using a mail-out/mail-back methodology, which typically gets a higher response rate than phone for the same dollars spent. A higher response rate lessens the worry that those who did not respond are different than those who did respond.
- Selecting households at random within the community to receive the survey to ensure that the households selected to receive the survey are representative of the larger community.
- Over-sampling multi-family housing units to improve response from hard-to-reach, lower income or younger apartment dwellers.
- Selecting the respondent within the household using an unbiased sampling procedure; in this case, the "birthday method." The cover letter included an instruction requesting that the respondent in the household be the adult (18 years old or older) who most recently had a birthday, irrespective of year of birth.
- Contacting potential respondents three times to encourage response from people who may have different opinions or habits than those who would respond with only a single prompt.
- Inviting response in a compelling manner (using appropriate letterhead/logos and a signature of a visible leader) to appeal to recipients' sense of civic responsibility.
- Providing a pre-addressed, postage-paid return envelope.
- Offering the survey in Spanish or other language when requested by a given community.
- Weighting the results to reflect the demographics of the population.

The answer to the second question about how closely the perspectives recorded on the survey reflect what residents really believe or do is more complex. Resident responses to surveys are influenced by a variety of factors. For questions about service quality, residents' expectations for service quality play a role as well as the "objective" quality of the service provided, the way the resident perceives the entire community (that is, the context in which the service is provided), the scale on which the resident is asked to record his or her opinion and, of course, the opinion, itself, that a resident holds about the service. Similarly a resident's report of certain behaviors is colored by what he or she believes is the socially desirable response (e.g., reporting tolerant behaviors toward "oppressed groups," likelihood of voting for a tax increase for services to poor people, use of alternative modes of travel to work besides the single occupancy vehicle), his or her memory of the actual behavior (if it is not a question speculating about future actions, like a vote), his or her confidence that he or she can be honest without suffering any negative consequences (thus the need for anonymity) as well as the actual behavior itself.

How closely survey results come to recording the way a person really feels or behaves often is measured by the coincidence of reported behavior with observed current behavior (e.g., driving habits), reported intentions to behave with observed future behavior (e.g., voting choices) or reported opinions about current community quality

with objective characteristics of the community (e.g., feelings of safety correlated with rates of crime). There is a body of scientific literature that has investigated the relationship between reported behaviors and actual behaviors. Well-conducted surveys, by and large, do capture true respondent behaviors or intentions to act with great accuracy. Predictions of voting outcomes tend to be quite accurate using survey research, as do reported behaviors that are not about highly sensitive issues (e.g., family abuse or other illegal or morally sanctioned activities). For self-reports about highly sensitive issues, statistical adjustments can be made to correct for the respondents' tendency to report what they think the "correct" response should be.

Research on the correlation of resident opinion about service quality and "objective" ratings of service quality vary, with some showing stronger relationships than others. NRC's own research has demonstrated that residents who report the lowest ratings of street repair live in communities with objectively worse street conditions than those who report high ratings of street repair (based on road quality, delay in street repair, number of road repair employees). Similarly, the lowest rated fire services appear to be "objectively" worse than the highest rated fire services (expenditures per capita, response time, "professional" status of firefighters, breadth of services and training provided). Resident opinion commonly reflects objective performance data but is an important measure on its own. NRC principals have written, "If you collect trash three times a day but residents think that your trash haul is lousy, you still have a problem."

### Selecting Survey Recipients

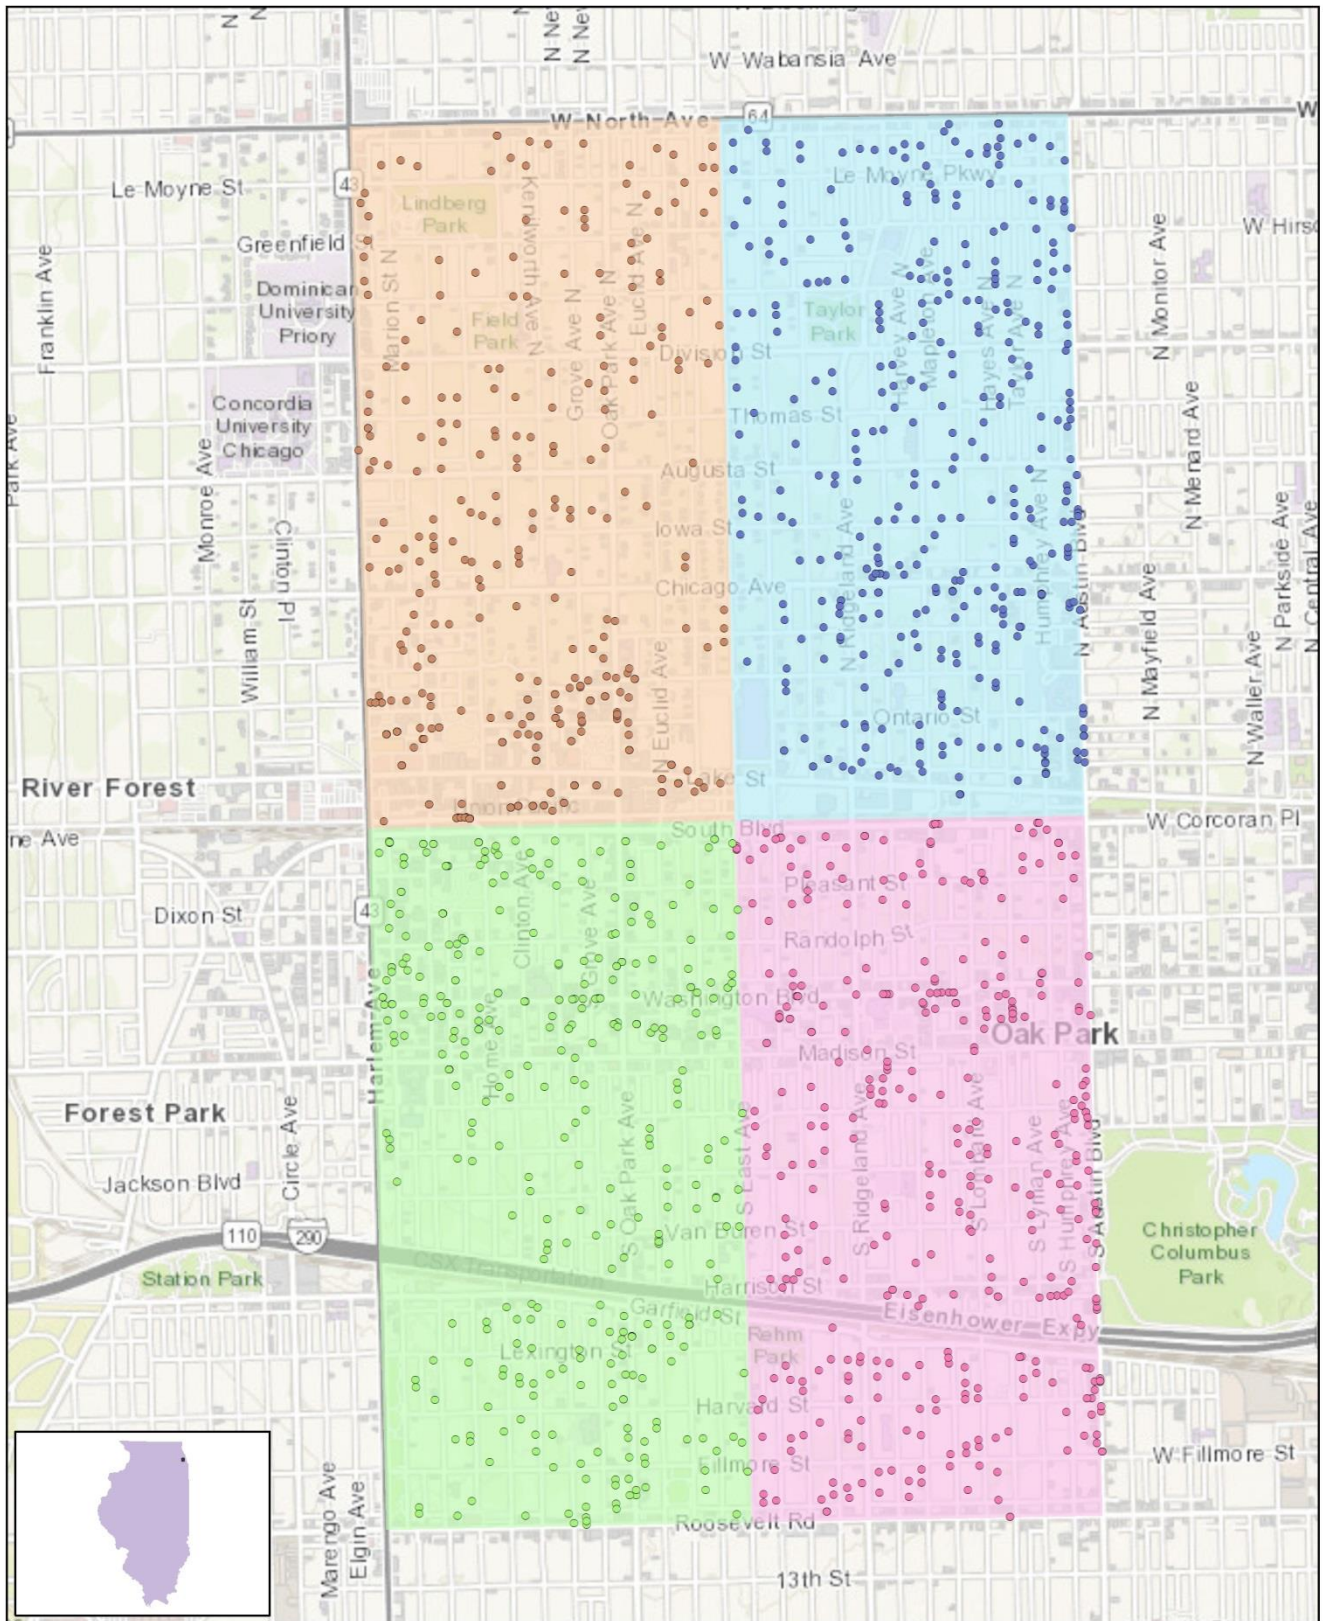

"Sampling" refers to the method by which households were chosen to receive the survey. All households within the Village of Oak Park were eligible to participate in the survey. A list of all households within the zip codes serving Oak Park was purchased from Go-Dog Direct based on updated listings from the United States Postal Service. Since some of the zip codes that serve the Village of Oak Park households may also serve addresses that lie outside of the community, the exact geographic location of each housing unit was compared to community boundaries using the most current municipal boundary file (updated on a quarterly basis) and addresses located outside of the Village of Oak Park boundaries were removed from consideration. Each address identified as being within Village boundaries was further identified as being within one of the four quadrants of Oak Park.

To choose the 1,500 survey recipients, a systematic sampling method was applied to the list of households previously screened for geographic location. Systematic sampling is a procedure whereby a complete list of all possible households is culled, selecting every *Nth* one, giving each eligible household a known probability of selection, until the appropriate number of households is selected. Multi-family housing units were selected at a higher rate as residents of this type of housing typically respond at lower rates to surveys than do those in single-family housing units. Figure 1 displays a map of the households selected to receive the survey; this map also displays the four quadrants of the Village. In general, because of the random sampling techniques used, the displayed sampling density will closely mirror the overall housing unit density (which may be different from the population density). While the theory of probability assumes no bias in selection, there may be some minor variations in practice (meaning, an area with only 15% of the housing units might be selected at an actual rate that is slightly above or below that).

An individual within each household was selected using the birthday method. The birthday method selects a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the cover letter accompanying the questionnaire.

## Survey Administration and Response

Selected households received three mailings, one week apart, beginning on October 16, 2017. The first mailing was a prenotification postcard announcing the upcoming survey. The next mailing contained a letter from the Village President inviting the household to participate, a questionnaire and a postage-paid return envelope. The final mailing contained a reminder letter, another survey and a postage-paid return envelope. The second cover letter asked those who had not completed the survey to do so and those who had already done so to refrain from turning in another survey. The survey was available in only English. The Village of Oak Park chose to augment its administration of The NCS with several services, including demographic subgroup comparisons and geographic subgroup comparisons. The results of these additional services have been provided under separate cover. Completed surveys were collected over the following seven weeks.

About 4% of the 1,500 surveys mailed were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the remaining 1,442 households that received the survey, 476 completed the survey, providing an overall response rate of 33%. Of the 476 completed surveys, 80 were completed online. Additionally, responses were tracked by quadrant; response rates by quadrant ranged from 32% to 34%. The response rate(s) were/was calculated using AAPOR's response rate #2<sup>1</sup> for mailed surveys of unnamed persons.

Table 75: Survey Response Rates by Quadrant

	Northwest	Northeast	Southeast	Southwest	Overall
Total sample used	375	375	375	375	1,500
I=Complete Interviews	115	120	120	115	470
P=Partial Interviews	1	2	2	1	6
R=Refusal and break off	0	0	0	0	0
NC=Non Contact	0	0	0	0	0
O=Other	0	0	0	0	0
UH=Unknown household	0	0	0	0	0
UO=Unknown other	236	243	242	245	966
Response rate: (I+P)/(I+P) + (R+NC+O) + (UH+UO)	33%	33%	34%	32%	33%

## Confidence Intervals

It is customary to describe the precision of estimates made from surveys by a “level of confidence” and accompanying “confidence interval” (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents’ opinions are relied on to estimate all residents’ opinions.<sup>2</sup>

The margin of error for the Village of Oak Park survey is no greater than plus or minus five percentage points around any given percent reported for all respondents (476 completed surveys).

For subgroups of responses, the margin of error increases because the number of respondents for the subgroup is smaller. For subgroups of approximately 100 respondents, the margin of error is plus or minus 10 percentage points.

## Survey Processing (Data Entry)

Upon receipt, completed surveys were assigned a unique identification number. Additionally, each survey was reviewed and “cleaned” as necessary. For example, a question may have asked a respondent to pick two items out of a list of five, but the respondent checked three; in this case, NRC would use protocols to randomly choose two of the three selected items for inclusion in the dataset.

<sup>1</sup> See AAPOR's Standard Definitions here: [http://www.aapor.org/Standards-Ethics/Standard-Definitions-\(1\).aspx](http://www.aapor.org/Standards-Ethics/Standard-Definitions-(1).aspx) for more information

<sup>2</sup> A 95% confidence interval indicates that for every 100 random samples of this many residents, 95 of the confidence intervals created will include the “true” population response. This theory is applied in practice to mean that the “true” perspective of the target population lies within the confidence interval created for a single survey. For example, if 75% of residents rate a service as “excellent” or “good,” then the 4% margin of error (for the 95% confidence interval) indicates that the range of likely responses for the entire community is between 71% and 79%. This source of uncertainty is called sampling error. In addition to sampling error, other sources of error may affect any survey, including the non-response of residents with opinions different from survey responders. Though standardized on The NCS, on other surveys, differences in question wording, order, translation and data entry, as examples, can lead to somewhat varying results.

## The National Citizen Survey™

All surveys then were entered twice into an electronic dataset; any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed.

NRC used Qualtrics, a web-based survey and analytics platform, to collect the online survey data. Use of an online system means all collected data are entered into the dataset when the respondents submit the surveys. Skip patterns are programmed into the system so respondents are automatically “skipped” to the appropriate question based on the individual responses being given. Online programming also allows for more rigid control of the data format, making extensive data cleaning unnecessary.

A series of quality control checks was also performed to ensure the integrity of the web data. Steps may include and not be limited to reviewing the data for clusters of repeat IP addresses and time stamps (indicating duplicate responses) and removing empty submissions (questionnaires submitted with no questions answered).

### Survey Data Weighting

The demographic characteristics of the survey respondents were compared to those found in the 2010 Census and American Community Survey estimates for adults in the Village of Oak Park. The primary objective of weighting survey data is to make the survey respondents reflective of the larger population of the community. The characteristics used for weighting were tenure, housing unit type, race, sex and age and quadrant. No adjustments were made for design effects. The results of the weighting scheme are presented in the following table.

Table 76: Oak Park, IL 2017 Weighting Table

Characteristic	Population Norm	Unweighted Data	Weighted Data
<b>Housing</b>			
Rent home	40%	17%	38%
Own home	60%	83%	62%
Detached unit*	43%	63%	44%
Attached unit*	57%	37%	56%
<b>Race and Ethnicity</b>			
White	69%	81%	69%
Not white	31%	19%	31%
Not Hispanic	94%	96%	95%
Hispanic	6%	4%	5%
<b>Sex and Age</b>			
Female	55%	61%	56%
Male	45%	39%	44%
18-34 years of age	27%	8%	24%
35-54 years of age	42%	36%	43%
55+ years of age	32%	56%	34%
Females 18-34	14%	6%	14%
Females 35-54	23%	21%	23%
Females 55+	18%	35%	19%
Males 18-34	12%	3%	10%
Males 35-54	19%	15%	20%
Males 55+	14%	21%	14%
<b>Quadrants</b>			
Northwest	24%	24%	24%
Northeast	18%	26%	18%
Southeast	27%	26%	27%
Southwest	31%	24%	31%

\* American Community Survey 2011 5-year estimates

## Survey Data Analysis and Reporting

The survey dataset was analyzed using the Statistical Package for the Social Sciences (SPSS). For the most part, the percentages presented in the reports represent the “percent positive.” The percent positive is the combination of the top two most positive response options (i.e., “excellent” and “good,” “very safe” and “somewhat safe,” “essential” and “very important,” etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating “yes” or participating in an activity at least once a month.

On many of the questions in the survey respondents may answer “don’t know.” The proportion of respondents giving this reply is shown in the full set of responses included in Appendix A. However, these responses have been removed from the analyses presented in the reports. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

## **Appendix D: Survey Materials**

Dear Oak Park Resident,

It won't take much of your time to make a big difference!

Your household has been randomly selected to participate in a survey about your community. Your survey will arrive in a few days.

Thank you for helping create a better Village!

Sincerely,

Anan Abu-Taleb  
Village President  
Village of Oak Park

Dear Oak Park Resident,

Dear Village of Oak Park Resident:

You have been selected at random to participate in the 2017 Oak Park Citizen Survey. By taking a few minutes to fill out the enclosed survey, you can help shape the future of Oak Park.

Your participation in this survey is very important - especially since your household is one of only a small number being surveyed. Your feedback will help Oak Park make decisions that affect our Village.

**A few things to remember:**

- **Your responses are completely anonymous.**
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- **You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:**

<http://bit.ly/2xnd4Ex>

If you have any questions about the survey please call 708-358-5770.

Thank you for your time and participation!

A handwritten signature in black ink, appearing to read "Anan Abu-Taleb", with a horizontal line above it.

Anan Abu-Taleb  
Village President

village@oak-park.us

Dear Village of Oak Park Resident:

If you haven't already responded to the 2017 Oak Park Citizen Survey, here's a second chance. **(If you completed the survey and sent it back, we thank you for your time and ask you to recycle this survey. Please do not respond twice.)**

You were selected at random to participate in the survey. Your participation is very important - especially since your household is one of only a small number being surveyed. Your feedback will help Oak Park make decisions that affect our Village.

**A few things to remember:**

- **Your responses are completely anonymous.**
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- **You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:**

If you have any questions about the survey please call 708-358-5770.

Thank you for your time and participation!

Anan Abu-Taleb  
Village President

# The Village of Oak Park 2017 Citizen Survey

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Please select the response (by circling the number or checking the box) that most closely represents your opinion for each question. Your responses are anonymous and will be reported in group form only.

**1. Please rate each of the following aspects of quality of life in Oak Park:**

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Oak Park as a place to live.....	1	2	3	4	5
Your neighborhood as a place to live .....	1	2	3	4	5
Oak Park as a place to raise children.....	1	2	3	4	5
Oak Park as a place to work .....	1	2	3	4	5
Oak Park as a place to visit .....	1	2	3	4	5
Oak Park as a place to retire .....	1	2	3	4	5
The overall quality of life in Oak Park .....	1	2	3	4	5

**2. Please rate each of the following characteristics as they relate to Oak Park as a whole:**

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Overall feeling of safety in Oak Park.....	1	2	3	4	5
Overall ease of getting to the places you usually have to visit .....	1	2	3	4	5
Quality of overall natural environment in Oak Park.....	1	2	3	4	5
Overall "built environment" of Oak Park (including overall design, buildings, parks and transportation systems) .....	1	2	3	4	5
Health and wellness opportunities in Oak Park .....	1	2	3	4	5
Overall opportunities for education and enrichment .....	1	2	3	4	5
Overall economic health of Oak Park .....	1	2	3	4	5
Sense of community .....	1	2	3	4	5
Overall image or reputation of Oak Park .....	1	2	3	4	5

**3. Please indicate how likely or unlikely you are to do each of the following:**

	<i>Very likely</i>	<i>Somewhat likely</i>	<i>Somewhat unlikely</i>	<i>Very unlikely</i>	<i>Don't know</i>
Recommend living in Oak Park to someone who asks .....	1	2	3	4	5
Remain in Oak Park for the next five years.....	1	2	3	4	5

**4. Please rate how safe or unsafe you feel:**

	<i>Very safe</i>	<i>Somewhat safe</i>	<i>Neither safe nor unsafe</i>	<i>Somewhat unsafe</i>	<i>Very unsafe</i>	<i>Don't know</i>
In your neighborhood during the day .....	1	2	3	4	5	6
In Oak Park's downtown/commercial area during the day .	1	2	3	4	5	6
In your neighborhood after dark.....	1	2	3	4	5	6
In Oak Park's downtown/commercial area after dark.....	1	2	3	4	5	6

**5. Please rate each of the following characteristics as they relate to Oak Park as a whole:**

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Traffic flow on major streets .....	1	2	3	4	5
Ease of public parking .....	1	2	3	4	5
Ease of travel by car in Oak Park.....	1	2	3	4	5
Ease of travel by bicycle in Oak Park .....	1	2	3	4	5
Ease of walking in Oak Park .....	1	2	3	4	5
Availability of paths and walking trails .....	1	2	3	4	5
Air quality .....	1	2	3	4	5
Cleanliness of Oak Park.....	1	2	3	4	5
Overall appearance of Oak Park.....	1	2	3	4	5
Public places where people want to spend time .....	1	2	3	4	5
Variety of housing options .....	1	2	3	4	5
Availability of affordable quality housing .....	1	2	3	4	5
Fitness opportunities (including exercise classes and paths or trails, etc.).....	1	2	3	4	5
Recreational opportunities.....	1	2	3	4	5
Availability of affordable quality food .....	1	2	3	4	5
Availability of affordable quality health care .....	1	2	3	4	5
Availability of preventive health services .....	1	2	3	4	5
Availability of affordable quality mental health care .....	1	2	3	4	5
Ease of travel by bus in Oak Park .....	1	2	3	4	5
Ease of travel by rail in Oak Park.....	1	2	3	4	5

**6. Please rate each of the following characteristics as they relate to Oak Park as a whole:**

	<i>Excellent</i>	<i>Good</i>	<i>Fair</i>	<i>Poor</i>	<i>Don't know</i>
Availability of affordable quality child care/preschool.....	1	2	3	4	5
Adult educational opportunities.....	1	2	3	4	5
Opportunities to attend cultural/arts/music activities.....	1	2	3	4	5
Opportunities to participate in religious or spiritual events and activities.....	1	2	3	4	5
Employment opportunities.....	1	2	3	4	5
Shopping opportunities.....	1	2	3	4	5
Cost of living in Oak Park.....	1	2	3	4	5
Overall quality of business and service establishments in Oak Park.....	1	2	3	4	5
Vibrant downtown/commercial area.....	1	2	3	4	5
Overall quality of new development in Oak Park.....	1	2	3	4	5
Opportunities to participate in social events and activities.....	1	2	3	4	5
Opportunities to volunteer.....	1	2	3	4	5
Opportunities to participate in community matters.....	1	2	3	4	5
Openness and acceptance of the community toward people of diverse backgrounds.....	1	2	3	4	5
Neighborliness of residents in Oak Park.....	1	2	3	4	5
